

Prashika Laxman Dabhade

Enthusiastic and detail-oriented data analytics graduate with proficiency in Python, SQL, and Tableau, seeking an entry-level role to leverage analytical skills in uncovering insights and driving business success.

PROJECTS

1. Netflix Content Analysis
 - Conducted exploratory data analysis (EDA) on Netflix's content dataset using Python.
 - Visualized trends in content categories, release years, and country-specific preferences.
 - Presented findings in a report using Jupyter Notebook.
2. Sale Performance Dashboard
 - Designed an interactive Tableau dashboard to track sales metrics across regions, products, and time periods.
 - Used SQL to extract and clean data from a company database.
 - Delivered insights to optimise marketing campaigns, resulting in a 10% increase.
3. Customer Relation Analysis
 - Analyzed a retail dataset of 50,000 customers to identify churn patterns using Python (Pandas and Seaborn)
 - Built a logistic regression model with 82% accuracy to predict customer churn.
 - Recommended strategies to improve customer retention based on finding.

Educational Background

B.Tech In Electronics And Telecommunications Engineering

Deogiri Institue Of Engineering And Management Studies, Aurangabad- 72%

Diploma In Electronics And Telecommunications Engineering

CSMSS College of Polytechnic, Aurangabad- 69%

SSC

Sharda Mandir Girls High School- 62%

Technical Skills

Languages

- C
- Python
- MySQL
- PowerBI
- Microsoft excel

Libraries

- Numpy
- Pandas
- Seaborn
- Matplotlib

Databases

MySQL

Certification/Short Courses

- Data Analyst
- Red Hat Certified System Administrator(RHEL-7)

Soft Skills

- Problem-solving
- Adaptability
- Team Work
- Fast Learning
