SUMMARY

Detail-oriented and results-driven Business Analyst with a strong foundation in data analysis, data cleaning, visualization, and interpretation. Proficient in SQL, Power BI, Excel, Tableau, and Python with a strong foundation in statistical analysis and data visualization. Seeking to leverage analytical expertise to solve complex problems, optimize processes, and contribute to data-driven decision-making.

EDUCATION

Master of Business Administration (Business Analyst)

2023-2025

NaavSahyadri College of Management & Research, Pune 7.03 CGPA

SKILLS

- Data Analysis: Proficient in Excel, Power BI, and Python for data analysis and reporting.
- Data Visualization: Experienced in creating dashboards and visual reports using Power BI.
- Databases: Skilled in SQL, database design, and management. (PostgreSQL).
- Business Analysis : SWOT , PESTLE, BPMN, SDLC, Agile/Scrum Methodology , process improvement
- Programming: Knowledge of Python for data manipulation and analysis.
- Content Creator: Youtube, ChatGPT, Grok, Filmora, Capcut, Pixellab, Microsoft Visualizer.
- Other Skills: ETL Processes, Report Building, Excellent Communication, Critical Thinking, Problem Solving.

EXPERIENCE

Business Analyst Internship Predict-RAM

March 2025 – May 2025

- Collected, cleaned, and analyzed raw business data to extract actionable insights
- Assisted in preparing dashboards and visual reports using Excel, Power BI
- Created and maintained Business Requirement Documents (BRD) and Functional Requirement Documents (FRD).
- Managing projects, developing project plans, and monitoring performance.
- Staying up-to-date on the latest process and IT advancements to automate and modernize systems
- Ensured all documentation and reporting complied with company standards and audit requirements

PROJECTS

Project 1: Motorola Sales Performance Analysis Dashboard / PowerBI

- Built a dynamic Power BI dashboard to analyze monthly sales performance for Motorola across cities in India
- Used map visualizations for city-wise sales distribution and pie charts for payment method analysis
- Integrated multiple data sources and filters (Month, Mobile Model, Brand, Payment Method) for interactive analysis
- Enabled data-driven decision-making by presenting actionable insights in a clean, visually engaging dashboard format

Project 2: Emergency Room Patient Analytics / Excel

- Included a department-wise referral analysis, identifying departments such as General Practice, Orthopedics, and Cardiology..
- Utilized Excel charts, slicers, pivot tables, and conditional formatting for dynamic data visualization and filtering
- Improved hospital resource planning and patient flow analysis through real-time metrics and dashboards.

Project 3: Credit Card Fraud Detection State of Art Machine Learning

- State-of-the-art models also focus on real-time detection and scalability, ensuring the system can evolve as fraud strategies change
- Designed a machine learning-based fraud detection system to identify real-time fraudulent transactions with high accuracy
- Handled missing values, normalized data, applied feature selection, and resolved class imbalance using resampling techniques like SMOTE.

CERTIFICATIONS

- **Excel R**: Completed Data Analyst Course by Excel-R, gaining proficiency in tools like Power BI, SQL, Excel for data cleaning, analysis, and visualization.
- **Predict-RAM** : The internship helps to develop a strong understanding of data trends, reporting, and decision-making processes.

COURSE WORK

- Data Analysis , Data Cleaning & Preprocessing, Visualization , Database Management System, Statistical Analysis

STRENGTH

- Quick Learner, Problem Solving, Critical Thinking Time Management, Strong Communication, Storytelling
