SUMMARY

Aspiring Data Scientist with a background in Electronics and Telecommunication Engineering and hands-on experience in Python, Machine Learning, SQL and Power BI. Skilled in EDA, predictive modeling, and real-world project deployment. Strong analytical and problem-solving skills with a passion for turning data into actionable insights.

TECHNICAL SKILLS

- Programming Languages: Python, SQL, Basic R
 - Libraries & Tools: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, PyTorch, Power BI
 - Data Handling: Exploratory Data Analysis (EDA), Data Wrangling, Data Preprocessing, Feature Engineering, Data Visualization
 - Machine Learning: Regression, Classification, Clustering, Model Evaluation, Time Series Forecasting.
 - Advanced Topics: Deep Learning, Natural Language Processing (NLP), Generative AI
-

EXPERIENCE

Data Science Intern - AIVariant

Nov 2024 – Apr 2025

- Collaborated on real-world data science projects involving exploratory data analysis, predictive modeling, and evaluation.
- Developed a regression-based model to predict solar power generation, improving forecasting accuracy.
- Performed job market analysis by scraping and analyzing large datasets from Naukri.com using Python and machine learning algorithms.
- Gained end-to-end exposure to the data science lifecycle, including data cleaning, feature engineering, model training, and performance assessment.

Data Analytics Trainee - MedTourEasy – Remote

Mar 2025

- Completed a focused training program in data analytics, emphasizing real-world business applications.
- Extracted insights from chemical component datasets using Python and Excel-based analysis.
- Conducted thorough data cleaning, transformation, and visualization using tools such as Pandas and Matplotlib.
- Showcased strong analytical thinking, collaboration, and initiative through independently led project components.

EDUCATION

Dr.Ambedkar Institute of Technology, Bengaluru

Bachelor of Engineering (BE), Electronics & Telecommunication

Dec 2020 – June 2024 | CGPA: 7.71

Science Academy PU College, Davanagere

XII (PUC) | Mar 2019 – Mar 2020 | Score: 85%

PROJECTS

Solar Power Generation Prediction

- Analyzed time-series data on solar power generation to uncover patterns and seasonal trends influencing energy output.
- Developed and evaluated regression models using Python (Scikit-learn) to forecast future power generation, supporting strategic energy planning.
- Delivered insights that could aid energy firms in optimizing solar resource utilization.

Naukri Job Market Analysis

- Scraped thousands of job listings from Naukri.com across roles, industries, and locations using Python and BeautifulSoup.
- Conducted in-depth exploratory data analysis to uncover hiring trends, in-demand skills, and salary distributions.
- Built a Streamlit-based interactive dashboard for visualizing job demand segmented by skill, region, and experience level—offering value to job seekers and HR professionals alike.

Sentiment Analysis on Product Reviews

- Collected and cleaned large-scale product review data from e-commerce platforms.
 - Applied NLP techniques including text preprocessing, tokenization, and vectorization using NLTK and Scikit-learn.
 - Built and fine-tuned classification models (Logistic Regression, SVM) to predict sentiment (positive, negative, neutral) with high accuracy.
 - Created actionable insights into customer sentiment trends, providing business value for marketing and product teams.
-

CERTIFICATES

Foundations: Data, Data, Everywhere Certificate

Data Science Certification

Data Science Internship Certificate

Data Analytics Traineeship Certificate
