PROFILE

Aspiring data analyst with a strong foundation in statistics, data visualization, and programming, seeking to leverage analytical and problem-solving skills to extract actionable insights and support data-driven decision making.

EDUCATION

Kazi Nazrul University

Bachelor of Commerce in Accountancy

- Major in Accountancy
- CGPA 7.78

Asansol, India

2020 – 2023

SKILLS

Technical: SQL, Python, Data Visualization, Tableau, Power BI, Advance Excel, Data Modelling, Data Visualization, Pandas, Seaborn, NumPy

CERTIFICATIONS

- Power Bi Job Simulation_pwc – ([link](#))
- Certification in Data Analytics – April'25 – ([link](#))
- Certification in Sql – ([link](#))

INTERNSHIP

DataSpace Academy – ([link](#))

Tools: Excel, Power Bi, Python(EDA), PowerPoint

Role: Data Analyst Intern | Duration 1 months

Kolkata, India

April 2025

Churn Analysis Project

- Analysed customer churn trends using Excel and Python, uncovering patterns in demographics, contract types, and payment methods.
- Built an interactive Power BI dashboard with slicers and KPIs to visualize churn drivers and support business decisions.
- Delivered a professional presentation of findings; awarded an **A+ grade** for performance and business insight quality.

PROJECTS

Churn Analysis (Python, EDA) – [Github](#)

- Built a predictive model using **logistic regression** to identify customers likely to churn.
- Perform data **preprocessing** and model evaluation.
- Achieved **80%** accuracy in predicting churn.

SQL Pizza Sales Analysis (Mysql) – [Github](#)

- Analysed key metrics like **total revenue, order trends, and top-selling pizzas**, identifying that **30% of revenue** came from just 3 pizza types.
- Solved 13+ practical business problems using SQL, applying joins, aggregations, subqueries, and window functions on pizza sales data.

Sales Insights (PowerBI, Mysql, Excel) – [GitHub](#)

- Designed and built interactive Power BI dashboards, increasing data visualization efficiency by 25%.
- Structured and optimized a MySQL database, improving data accessibility by 30%.
- Streamlined data cleaning and preprocessing in Excel, reducing processing time by 40%
