priyankabalaraddi@gmail.com ◇ [Linkedin](#) ◇ [Github](#)

OBJECTIVE

Results-driven Data Scientist with expertise in analytics and machine learning, seeking to leverage technical skills and innovative problem-solving abilities in a challenging role. Committed to delivering data-driven insights that optimize business processes and drive strategic decision-making.

SKILLS

Programming	Python, SQL, Tableau, Excel
Data Science	Machine Learning, Deep Learning, Data Visualization, Statistical Analysis
Tools(Beginner)	Apache Kafka, PL/SQL, Web Scraping, Android Studio
Databases	MySQL
Other	Data Cleaning, Data Preprocessing, Report Generation

EXPERIENCE

Data Science Intern

Apr 2024 - Aug 2024

The Data Monk, Infra Engineering team

Bangalore, Karnataka

Skills/Tools used: Python, Apache Kafka, PL/SQL, Web Scraping, Data Visualization

Contribution:

- Engineered a robust web scraping project "Product Review" to extract valuable market insights.
- Optimized data processing workflows by leveraging Apache Kafka and PL/SQL.
- Formulated and implemented data pipelines to streamline data processing and analysis workflows.

Data Analytics Trainee

MedTourEasy

Bangalore, Karnataka

Skills/Tools used: Python, SQL, Tableau, Excel, Data Cleaning, Data Visualization, Statistical Analysis

Contribution:

- Orchestrated the collection, cleaning, and analysis of large datasets to ensure data accuracy and integrity.
- Innovated detailed visualizations using Tableau to effectively communicate data insights.
- Generated comprehensive reports and dashboards, enhancing data-driven decision-making processes.

PROJECTS

Nephropathy Prediction Using Deep Learning Models

Skills/Tools used: Python, TensorFlow, Keras, Flask, OpenCV, CNN, ANN

Contribution:

- Developed an innovative deep learning system integrating CNN and ANN models to analyze CT scans and blood test data, achieving 99 Percent accuracy in detecting kidney tumors.
- Engineered a comprehensive solution combining medical imaging and clinical data analysis to enable early and accurate kidney cancer diagnosis.
- Designed and implemented a user-friendly web interface using Flask to streamline data input and deliver rapid diagnostic results for healthcare professionals.

Brain Stroke Prediction Using Machine Learning

Skills/Tools used: Python, Machine Learning algorithms, Data preprocessing techniques, Label encoding, Handling imbalanced data, Kaggle datasets

Contribution:

- Engineered a comprehensive machine learning solution for early stroke detection, achieving up to 99.33 Percent accuracy by implementing and optimizing multiple models including Random Forest, XGBoost, and KNN classifiers.
- Spearheaded data preprocessing and feature engineering efforts, including handling missing values, label encoding, and addressing class imbalance, to enhance model performance on a dataset of over 5,000 patient records.
- Developed and evaluated a robust prediction system utilizing various evaluation metrics (accuracy, precision, recall, F1-score), enabling more accurate and timely identification of stroke risk factors for improved patient outcomes.

Digital Data Transmission System of KSRTC

Skills/Tools used: C#, MySQL, Visual Studio Code, MVC Architecture

Contribution:

- Engineered a real-time data transmission system for KSRTC, enabling instantaneous transfer of ticket data to central servers after each transaction, significantly improving operational efficiency and data accuracy.
- Developed a comprehensive web-based application using C-hash and MySQL, implementing MVC architecture to create a user-friendly interface for administrators and conductors to manage ticket generation and reporting.
- Revolutionized bus management capabilities by designing a system that provides instant visibility into passenger counts and locations, allowing for dynamic resource allocation and improved service delivery.

CERTIFICATES

- Google Data Analytics Certificate (2023)
- NPTEL Data Analytics using Python (2024)

ACHIEVEMENTS

- Spearheaded the development of an innovative **kidney cancer detection system using deep learning**, achieving 99.00% accuracy and transforming diagnostic approaches.
- Successfully presented the **"Kidney Cancer Detection Project"** enhancing interest in AI-driven medical diagnostics and contributing to advancements in healthcare.
- Authored a research paper titled **"A Novel Health Monitoring System for Multiparameters: Blood Glucose, Temperature and EC"**.
- Presented research at the International conference **ICWITE** held at **IISc Bangalore**.
- Participated in poster presentation at **IEEE NKCon 2022 Conference** and oral presentation at **ICETEST 2023 Conference**.

EDUCATION

BLDEA's V.P. Dr. P.G. Halakatti College of Engineering and Technology, Vijayapura	2020-2024
Bachelor of Engineering in CSE(AI and ML)	CGPA: 7.1/10

Tungal P.U Science College,Vijayapura	2018-2020
PUC in Science	Percentage: 77/100
