## Profile

Analytical and results-driven professional experienced in solving business problems, uncovering insights, and supporting strategic decisions. Skilled at working with cross-functional teams to drive process improvements and deliver measurable impact in fast-paced, data-led, and product-oriented business environments.

## Professional Experience

### Business Analyst, 1DigitalStack

01/2025 – 04/2025

- Analyzed data across 20+ global e-marketplaces, delivering actionable insights to optimize sales performance and reduce inefficiencies for diverse clients.
- Automated key processes using Python, including email automation and real-time alerts, enhancing operational efficiency and responsiveness.
- Designed and maintained interactive dashboards in Excel and Power BI, enabling leadership to track KPIs and make data-driven decisions faster by 40%.

### Power BI Data Analyst Intern, Pianalytix

09/2024 – 12/2024

- Developed interactive dashboards from scratch using SQL-sourced datasets, advanced visualizations, and dynamic filters, enhancing stakeholder data comprehension.
- Analyzed datasets records using Power BI's DAX formulas (e.g., SUMX, RANKX), driving improvement in strategic decision-making.
- Streamlined workflows by generating tailored reports, reducing manual effort and accelerating reporting by 40%.

## Projects

### Automotive Company Analysis

- Developed interactive Power BI dashboards analyzing over 10,000 car sales records, enabling dynamic filtering by region, car model, and dealer performance. This provided stakeholders with real-time insights, reducing manual report generation time by 30%.
- Utilized advanced DAX formulas (RANKX) to create custom rankings and dynamic calculations for 50+ dealers, improving dealer performance evaluation and product profitability analysis, leading to a projected revenue increase of 15% based on pricing adjustments.
- Segmented customer data and visualized purchasing trends using Power BI, identifying key demographic insights that supported targeted marketing strategies and pricing adjustments.
- Provided strategic recommendations for improving product offerings and dealer partnerships, resulting in actionable insights that could enhance revenue by an estimated 20% and improve underperforming dealer output by 10%.

### Zomato Restaurant Analysis Using Python

- Analyzed 148+ restaurant records from Zomato to uncover trends in online delivery adoption, rating distribution, and dining preferences across major restaurant types.
- Applied Python libraries like Pandas, Seaborn, and Matplotlib to clean, transform, and visualize data, revealing that only 39% of restaurants offer online ordering, with cafes receiving the highest customer votes.
- Segmented user behavior insights such as preferred price ranges for couples and identified top-performing restaurants by vote count, aiding business decisions in marketing and pricing strategy.

### Funding Analysis of Indian Startups

- Assessed data for 1564 startups, 1635 investors, and 2072 investments totaling \$38.1 billion. Created a Power BI dashboard highlighting top sectors like E-Commerce (\$11.6bn) and leading cities such as Bangalore (\$18.6bn).
- Cleaned 3044 entries using SQL, addressing 20% data issues such as null values, duplicates, and non-standard formats. Standardized industry names into 16 sectors plus "others" and converted non-numeric amounts to numeric.
- Implemented advanced SQL techniques to standardize over 1,500 city names and update sector classifications; this effort optimized the data set for analytical processing and streamlined reporting across business intelligence tools.
- Addressed missing values by imputing or excluding 10% of data, ensuring dataset reliability. Developed a comprehensive Power BI dashboard, providing detailed and accurate insights into the startup ecosystem using advanced features like DAX functions and custom visuals for enhanced insights.

## Skills

(SQL | Excel | Power BI | Python | Database Management System | Statistical Tools | Analytical Thinking | Process Automation | Business Communication | Problem Solving)

## Education

**B.Tech (Electronics and Communication Engineering), Jaypee Institute Of Information Technology**  
CGPA: 7.1

2021 – 2025  
Noida, India

## Certificates

**The Business Intelligence Analyst Course 2024-Udemy**  
Advanced

**Python for Data Analysis-Udemy**  
Advanced
