EDUCATION

Galgotias College of Engineering and Technology

Bachelor of Technology in Information Technology

Greater Noida, Uttar Pradesh

Aug. 2022 – Jul 2025

Government Polytechnic, Firozabad

Diploma in Engineering

Firozabad, Uttar Pradesh

Aug. 2019 – Jul. 2022

EXPERIENCE

Machine Learning Trainee

Satsafeti PVAS

Apr 2024 – Dec 2024

Remote, India

- Created a suite of predictive models for state-of-the-art products, leveraging cloud technology; successful deployment across Unity platforms resulted in increased user retention rates, with over 1M+ active users engaging with the new features.
- Worked as a core member of the ML team, collaborating with Satsafeti to develop a state-of-the-art product projected to enhance manufacturing efficiency by up to 30% and reduce operational costs by 15 Percent.
- Achieved a deployment success rate of 95% for YOLO-driven models on edge devices; provided training sessions for 8 team members, ensuring seamless integration and knowledge transfer for future projects.

Data Analytics

IBM SkillBuild

Jan. 2024 – Feb. 2024

Remote, India

- Developed predictive models using regression and classification techniques, resulting in a 20% increase in forecast accuracy for sales projections.
- Created interactive dashboards in Tableau to visualize key business metrics, leading to a 30% improvement in decision-making efficiency for senior management by enabling more data-driven decisions.
- Automated data reporting processes using Python, reducing manual effort and improving data accuracy, while also accelerating report generation time by 50%

PROJECTS

Speed Estimation of Vehicles | Python, Roboflow, NumPy, OpenCV, Matplotlib, Pandas

Jan 2024 – Feb 2024

- Utilized the YOLO framework in conjunction with optical flow analysis to estimate vehicle speeds from video feeds, improving traffic monitoring system accuracy by 25% and enabling more effective traffic management.
- Integrated vehicle speed estimation algorithms with edge computing devices, optimizing performance and reducing latency for real-time traffic management applications by 40%.
- Implemented a vehicle speed estimation system in Python using OpenCV and TensorFlow, enhancing traffic management by increasing speed estimation accuracy and contributing to safer and more efficient traffic control, while also reducing processing time by 30%.

Job Posting Web App | React, Node, Express, Javascript, Git

Aug 2023 – Oct 2023

- Developed a full-stack job posting web application using React.js for the frontend and Node.js with Express for the backend, delivering a seamless user experience for job seekers and employers and improving user engagement by 30%.
- Optimized the platform's performance by reducing page load times by 40% through code minification, image optimization, and efficient database queries.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, HTML/CSS

Frameworks: React, Node.js, FastAPI, Machine Learning, Computer Vision

Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Libraries: pandas, NumPy, Matplotlib, openCV

CERTIFICATIONS

Full-stack web development by Angla Yu

Java 8 by Abdul bari

100 day bootcamp of python by Angla Yu
