SHYAMALA ABHISHEK REDDY

E-mail: abhishekshyamala@gmail.com

CAREER OBJECTIVE:

An independent and self-motivated undergraduate looking to work in an organization which provides me with ample opportunities to enhance my skills and knowledge contributing for the growth of your organization.

EDUCATIONAL QUALIFICATIONS:

Course/Degree	Institute/College	Board/University	Year of Passing	Percentage
Bachelor of Technology(ECE)	Anurag University, Hyderabad	Autonomous (Pvt Univ)	2025	76.28%
MPC	Sri Chaitanya Junior College, Hayath Nagar	TSBIE	2021	87.4%
SSC	Holy Angels High School, Mahabubabad	Board of secondary Education	2019	93.00%

SKILLS:

- * C Programming
- * Python Programming
- * Basics of Java
- * MySQL
- * MS Office
- * Power BI Desktop

PROJECTS:

1. Home Automation using Verilog: [Minor Project]

- Developed a Verilog-based home automation system to simulate control over appliances like lights and fans.
- Wrote modular Verilog code implementing control logic based on binary input conditions.
- Simulated the design using Xilinx, validating functionality through waveform analysis.

- Created and executed testbenches to ensure correct operation under various scenarios.
- Focused on behavioral modeling, conditional logic, and timing accuracy in digital simulation.
- Enhanced proficiency in HDL design principles, simulation practices, and debugging techniques.

2. Solar based safety stick for farmers and Scarecrow for agricultural purposes:

[Major Project]

This project addresses two major challenges in agriculture: farmer safety during field operations and crop protection from animals.

i. Solar-Based Safety Stick:

- A **handheld device** powered entirely by solar panels mounted on the stick.
- Equipped with components like:
 - **Vibration sensors** to detect motion or unusual activity nearby.
 - **Buzzer/speaker system** to issue immediate warnings (e.g., wild animals, high-voltage wires, or snake presence).
 - **LED indicators** to ensure visibility in low-light or night conditions.
- Ensures that farmers working in isolated fields are **alerted to potential dangers**, reducing accident risk.
- Designed to be **lightweight, portable**, and durable for use in agricultural environments.

ii. Solar-Powered Scarecrow:

- Stationary, solar-powered unit installed in fields to **deter birds, monkeys, and wild animals**.
- Integrated with:
 - **Ultrasonic sound emitters**, simulating predator or human noises.
 - **Rotating arms and flashing lights**, activated through motion sensors or timed intervals.
- Unlike traditional scarecrows, this version dynamically responds to threats and **adapts its activity**, increasing effectiveness over time.

HOBBIES:

- Playing cricket
- Listening music
- Exploring technologies and global trends

DECLARATION:

I hereby declare that the above mentioned details are true to the best of my knowledge and request you to be enough to give me an opportunity to exhibit my abilities towards your esteemed organization for which I shall be thankful to you.
