 Pushkarani Pujari

 Belagavi, Karnataka

Career Objective

- ◇ Computer Science engineering student seeking an entry-level position in your company to exhibit my skills in using various tools and technologies and gaining more exposure and career growth opportunities.

Educational Qualification

Degree	Institution	CGPA/Percentage	Year
B.E.	KLE Technological University, Dr.M.S.Sheshgiri, Campus, Belagavi.	8.26	2025
Pre-University Course	Raja Lakhamagouda PU College of Science, Belagavi	88.83%	2021
Matriculation	St. Mary's High School, Belagavi	93.76%	2019

Projects

- ◇ **Prediction of Nitrogen Deficiency in Wheat Leaves**, a Machine Learning project. The project involved developing and training a deep learning model on a wheat leaf image dataset to accurately predict nitrogen deficiencies, with my role as a **Research Analyst** focusing on optimizing model parameters and enhancing prediction accuracy.
- ◇ **Visualization and Analysis of Influencers of Social Network**, a Social Network Analysis (SNA) project. We created a framework to analyze social media influencers' impact on network dynamics using directed graph visualization and traversal techniques, mapping their influence through connections, endorsements, and follower count, where I worked as a **Network Analyst** to implement traversal techniques and visualize influencer relationships.
- ◇ **Implementation of AI-Based Threat Detection in a Cloud Simulated Environment**, a cybersecurity project that simulated cloud-based attacks to develop an AI-driven Intrusion Detection System (IDS). We evaluated multiple ML models, deploying the best-performing one using Streamlit and Docker for real-time threat visualization and detection.

Technical Skills

Programming Languages ◇ C, C++, SQL

Tools/ Platforms ◇ Jupyter notebook, Google colab, Gephi, Latex.

Personal Details

Strengths: Creativity, Adaptability
Languages known: English, Kannada, Tulu, Hindi
Hobbies: Bharatanatyam, Sketching
