Analytical and detail-oriented Business Analyst with expertise in data analysis, ETL processes, and operational excellence. Skilled in leveraging SQL, Python, and data visualization tools to extract actionable insights and optimize business processes. Demonstrates a proactive approach to incident management, data validation, and troubleshooting in fast-paced and ambiguous environments. Committed to achieving operational efficiency and delivering data-driven customer experiences.

TECHNICAL SKILLS

- | | |
|--------------------------|--|
| • Incident Management: | Root Cause Analysis, SLA Management, Dashboard Monitoring |
| • Database Management: | ETL pipelines, Data Ingestion, Data Transformation, Data Validation, Data Monitoring |
| • Visualization Tools: | Power BI, MS Excel, Seaborn |
| • Data Analytics Skills: | SQL, Python (Pandas, Numpy), Excel, Seaborn, Power BI |
| • Soft Skills: | Critical Thinking, Communication, Problem Solving, Stakeholder Management |

WORK EXPERIENCE

Data Analyst Intern | 360digitmg, Bengaluru

05/2023 – 07/2024

- Worked on a **medical inventory optimization** project to enhance supply chain efficiency and reduce costs through data-driven insights.
- Performed **exploratory data analysis** (EDA) on large medical inventory datasets to identify trends, patterns, and anomalies
- Achieved a 30% reduction in inventory bounce rate, which contributed to an 18% increase in profitability.

Tools used: MS Excel, Vlookup, Pivot Table, Python, MySQL, Power BI desktop, Power query, DAX function

Artificial Intelligence Analyst Intern | Edunet, Remote

07/2023 – 08/2023

- Developed a **mental fitness tracker** using regression algorithms to quantify and monitor mental well-being.
- Integrated user input data, such as sleep quality, exercise duration, and mood, to generate personalized mental fitness scores.

Tools used: MS Excel, Python, Pivot Table, MS Word

PROJECTS

HR Analytics | Power BI |

- Created a **Power BI dashboard** to analyze daily attendance patterns, differentiating between Work from Office (WFO) and Work from Home (WFH) attendance.
- Identified that < 65% of employees chose WFO on Mondays and Fridays and analyzed **sick leave trends**, finding a 20% increase during winter.
- Generated insights to optimize meeting scheduling and team-building events based on in-office attendance trends.

Hospitality Analysis | Power BI |

- Performed **ETL processes** and created a comprehensive dashboard in Power BI to analyze hospitality metrics, including RevPAR, Occupancy%, Hotel Ratings, and ADR.
- Used Power Query Editor for data cleaning, DAX for measures & visualization with charts, cards, table & filter.
- Revealed losses due to the lack of dynamic pricing, and identified the correlation between low occupancy rates and poor hotel ratings.
- Designed visual filters for city, room category, and revenue contribution, providing actionable insights on room category revenue and necessary service improvements.

EDUCATION

Bachelor of Technology in Chemical Engineering

11/2020 – 06/2024

National Institute of Technology Andhra Pradesh

CERTIFICATES

- **Data Analysis with Python** – IBM
- **Artificial Intelligence** – IBM.
- **Microsoft Business Analyst Professional Certificate** - Coursera
