Education

VIT Bhopal University

Bachelor of Technology in Computer Science, 8.3 CGPA

Expected Graduation: July 2026

Bhopal, Madhya Pradesh

Carmel Convent Sr. Sec. School, BHEL Bhopal

12th Standard

May 2022

Bhopal, Madhya Pradesh

Technical Skills

Languages: C++, Python, Java, HTML/CSS, PHP, JavaScript, SQL

Technologies/Frameworks: Cloud Computing, Software testing, Angular.js, React, Node.js, Git, Deep Learning (PyTorch, TensorFlow)

Databases: MySQL, MongoDB, DynamoDB

Additional skills: Strong problem-solving abilities, demonstrated ability to quickly assimilate new technologies, demonstrated strong time management skills, critical thinking.

Relevant Coursework

- Data Structures
- OOP with C++
- Computer Networks
- Database Management
- Artificial Intelligence
- AWS Cloud Practitioner
- Operating Systems

Experience

YBI Foundation

Python Programming Intern

June 2025- July 2025

Bhopal, Madhya Pradesh

- Developed and optimized Python scripts to automate data processing, web scraping and testing, improving efficiency.
- Performed data cleaning, analysis, and visualization using Pandas, Matplotlib, Seaborn to derive actionable insights.
- Assisted in debugging and refactoring existing codebase, enhancing performance and reducing runtime by 70%.
- Consistently met project deadlines through effective time management.

Projects

Cancer Detection System | *Python, PyTorch, OpenCV, NumPy, Matplotlib*

January 2025

- Built a CNN-based skin cancer classifier using dermatoscopic images, achieving 99.1% benign / 83.1% malignant accuracy with 0.93 AUC, aiding early diagnosis.
- Trained and fine-tuned the model on a preprocessed dataset, leveraging transfer learning and data augmentation to improve generalization.
- Conducted rigorous bias analysis to ensure model fairness across diverse skin tones, addressing healthcare AI ethics.

Fabric Upcycling Platform | *HTML, CSS, JavaScript, Node.js, MongoDB*

October 2024

- Developed a full-stack e-commerce platform to buy/sell recycled clothing, promoting sustainable fashion and waste reduction.
- Implemented user authentication, product listings, and cart functionality with secure payment integration.
- Reduced platform latency by 40% through MongoDB query optimization and caching mechanisms.

Certifications

- Google Cloud GenAI Exchange program- Hack2Skill
- The Bits and Bytes of Computer Networking- Coursera
- Python Essentials : Vityarthi Certification

Achievements

- Semi-finalist in Walmart CodeHer's challenge.
- Solved over 100 data structures and algorithms problems on GeeksforGeeks, focusing on time and space optimization.
- Participated in Adobe India hackathon and Meesho hackathon.
