PROFILE

B.Tech graduate skilled in **Advanced Excel** (VLOOKUP, XLOOKUP, Pivot Tables, Dashboards) with experience in **SQL, Python, and data visualization**. Worked on projects involving **Advanced Excel, web scraping, ETL, and database management**. Passionate about turning raw data into actionable insights and eager to grow as a **Data Analyst**.

EDUCATION

B. Tech in Electronics and Communication Engineering 2019 – 2023
SRM University Chennai, India

TECHNICAL SKILLS

- **Data Analysis & Visualization:** Advanced Excel (VLOOKUP, XLOOKUP, INDEX-MATCH, Pivot Tables, Pivot Charts, Dashboards, Array Formulas, IF & IFS, Text/Date Functions, What-If Analysis, Data Cleaning), Power BI, Google Data Studio, SQL
- **Programming & Other:** Python (Pandas, NumPy – Basic Data Cleaning & Analysis), Basic Statistics & Math, ER Diagram Design
- **Data Engineering:** Web Scraping (Selenium, BeautifulSoup), Database Management (MySQL), ETL Concepts (Power Query, Power Pivot Basics, Data Transformation)

INTERNSHIP EXPERIENCE

Data Entry & Analytics Intern – Government Project (PACS) Jan 2023 – Mar 2023

- Entered and verified data into a government portal for Primary Agricultural Cooperative Societies (PACS), ensuring 100% accuracy.
- Used Excel to track, clean, and summarize large datasets for reporting purposes.
- Cross-checked sanctioned amounts for each PACS and informed the officer about discrepancies or approvals.
- Improved data consistency by identifying errors and suggesting corrections for cleaner records.

ANALYTICS & DATA PROJECTS

IMDb Regional Movie Analysis & Interactive Dashboard Apr 2025 – May 2025

- **Tools:** Python(pandas,selenium,Beautiful Soup), Power BI, Excel
- Acted as a **Data Analyst** to scrape, clean, and visualize 600+ movie records
- Developed a full-cycle analytics project by scraping data for 600+ Indian regional movies from IMDb, transforming raw data into actionable business insights.
- Engineered an interactive **Power BI dashboard** to visualize trends in ratings, revenue, and genre popularity, enabling dynamic filtering by language and year to identify niche audience preferences.
- Performed in-depth **Exploratory Data Analysis (EDA)** to uncover key market insights, such as Malayalam films achieving the highest average ratings while Hindi films led in gross revenue.
- Developed and presented a model for **data-driven content strategy** based on findings, demonstrating how to use analytics to influence business outcomes.

Grocery Store Management Database Project May 2025 – Jun 2025

- **Tools:** SQL
- Built a complete database system with 7 interconnected tables to manage suppliers, products, customers, orders, and employees for a grocery store.
- Used **SQL** to create relationships between tables with foreign keys, ensuring data stays accurate and up-to-date through automatic cascading updates and deletions.
- Wrote complex SQL queries across a 7-table relational database to generate actionable business insights, such as identifying the top 10% of customers contributing to 40% of sales and pinpointing peak sales days to optimize employee scheduling.
- Analyzed supplier contributions and employee sales to support better decision-making.
- Designed an **ER diagram** to clearly map out how all parts of the database connect, making it easy to maintain and scale.
- Ensured high data integrity through the use of foreign keys, constraints, and cascading updates/deletions, reflecting real-world business requirements.

Adidas Marketing Campaign Performance Dashboard Jun 2025 – Jun 2025

- **Tools:** Power BI, DAX, Ms Excel
- Performed **data analyst responsibilities**, transforming raw sales data into actionable dashboards
- Developed an interactive **Power BI dashboard** to analyze sales outcomes from a marketing campaign, providing actionable insights to drive growth and optimize marketing spend.
 - Translated raw sales data into key campaign metrics, visualizing performance by sales channel (Online vs. In-store), geographic region, and product category to identify "missing opportunity" areas.
 - Performed **trend analysis** to pinpoint peak sales months and identify "Men's Street Footwear" as the highest-performing product segment, directly informing future marketing focus.
 - Analyzed channel profitability, identifying "West Gear" and "Foot Locker" as top-performing retail partners with over \$80M in operating profit, providing a data-driven recommendation for future co marketing budget allocation.
- The dashboard empowers business leaders to make data-driven decisions on which product lines and regions to target for future campaigns to maximize **Return on Investment (ROI)**

- Digital Campaign Performance Tracker (Excel Project)

2025 – Jun 2025

 - Built an **Excel dashboard** to analyze performance of multiple marketing campaigns across platforms like Instagram, Facebook, and Google Ads.
 - Used **Pivot Tables, VLOOKUP, and advanced formulas (CTR, ROI, Conversion Rate)** to summarize and track KPIs.
 - Created **interactive charts & slicers** to visualize campaign ROI and identify high-performing channels, improving decision-making.

COURSE AND CERTIFICATION

SQL — HackerRank

Advanced Data Science with Python — NASSCOM
