INTERNSHIP

HCDS technologies, Hyderabad —Data Science Trainee

April 2024 - July 2024

We used Python and Power BI tools to analyse large data sets of salaries of HRs and developed a model to predict their future salaries. In addition to this we also analysed how companies are performing based on their data sets of social media posts.

VEI Technologies, Chennai — AI Intern

September 2023 - October 2023

Trained on AI tools, got understanding on how they work and applied them into work.

Linz Technologies, Chennai — Python Intern

February 2023 - March 2023

Trained on python tools, got understanding on how they work and applied them into work.

PROJECTS

Custom Outfit and Style Using Generative Adversarial Network (2024)

To overcome the time consuming and expensive work of fashion designing for shooting models for each of their design, we propose a Neural Network model called Generative Adversarial Network (GAN) this GAN is trained with already available outfit model dataset

SKILLS

Python Programming

Java

Data Science

SQL

ACHIEVEMENTS

Won 3rd Place in
Agri-Innovation Expo for Crop
Recommendation system.

LANGUAGES

English, Hindi, Telugu, Tamil

Crop Recommendation System (2020)

The crop recommendation system uses sensors like soil moisture sensor, temperature and humidity temperature and optical transducer (measures soil nitrogen, phosphorus and potassium contents) to collect real time data of soil and environment thereafter collected real time data is applied to AI predictive models to understand soil texture.

EDUCATION

Sri Sairam Engineering College, Chennai

Btech-Artificial Intelligence and Data Science(2020 - 2024)

CGPA-8.01

Gyanville Academy, Hyderabad

12th-Intermediate(Senior secondary examination)-2020

Percentage-89.5%

Sri Chaitanya Techno School, Hyderabad

10th-Secondary School Certificate-2018

Percentage-83%
