☎ +91-9111285368

Detail-oriented AI and software enthusiast with strong skills in Python, machine learning, and full-stack web development. Passionate about building scalable solutions and integrating AI into real-world applications. Seeking a Specialist Programmer role to apply technical skills and problem-solving abilities in a challenging environment.

Skills

- SQL - Basic
- Excel - Basic
- Machine Learning - Intermediate
- LLM - Basic
- Python - Intermediate
- C/C++ - Basic

Experience

Outlier

- Working as AI Training Engineer Dec 2024 - Current
- Helping in Training the AI Model for various clients and verifying the outputs.
 - Nightingale RLHF Coding project : Train an LLM by using data, reinforcement learning, and rigorous evaluation to improve accuracy and outputs.

Zuno By FoundIt

- Collaborated with marketing to develop 10+ ad campaigns, increasing campaign reach by 20% through data-driven targeting. Sep 2022 - Sep 2024
- Spearheaded promotional efforts, leveraging marketing strategies to enhance awareness and participation in various tests and campaigns. By crafting engaging content and deploying targeted campaigns.

Writo Education Pvt. Ltd.

- Working together with the development team to create multiple projects for local and global clients. May 2024 - August 2024
- Utilizing a variety of AI tools to craft designs and other creative works.

Projects

- HeArtInizer – Real-time Heart Rate Stabilization with ANFIS [↗](#)
(Python, MATLAB, ANFIS, Data Preprocessing)
 - Adaptive Neuro-Fuzzy Inference System (ANFIS) was integrated into an intelligent system that stabilizes erratic heart rates.
 - Collected and preprocessed real patient ECG data to train and test the model, achieving smoother heart rate predictions with lower variance.
- Online IDE [↗](#)
(HTML, CSS, JavaScript)
 - Designed a collaborative real-time coding platform that lets users write and preview HTML, CSS, and JS at the same time.
 - Firebase and Socket.io were integrated to improve collaboration by allowing multiple users to edit and view changes in real time.
 - For an improved user experience, a clear, responsive user interface was designed with live output rendering and syntax highlighting.
- Text Recognition from Image [↗](#)
(Python, OpenCV, Tesseract OCR)
 - Created a small program to automatically digitize and extract text from scanned documents and photos.
 - To increase OCR accuracy, preprocessed images were created using OpenCV techniques (grayscale conversion, noise reduction, thresholding).
 - Tesseract OCR was integrated to recognize printed text, producing dependable results even when inputs are noisy or have low contrast.

Certificates & Certification

- Oracle Machine Learning using Autonomous Database [- Link](#)
- Oracle Cloud Infrastructure 2025 Data Science Professional [- Link](#)
- Data Analysis with Python [- Link](#)

Education

SRM Institute of Science and Technology

2021-2025

- Bachelor in Technology of Artificial Intelligence
- GPA: 8.3
