EDUCATION

2021-2025	SHOOLINI UNIVERSITY <i>B. Tech in Biotechnology</i>	Himachal Pradesh, India 8 OGPA
2020-2021	MM INTERNATIONAL SCHOOL <i>C.B.S.E XII</i>	Jabalpur, India 82%

TECHNICAL SKILLS

- **Languages:** HTML, CSS, JavaScript, Python, SQL, VBA Macros.
- **Tool Used:** Power BI, MY SQL Workbench, Tableau, Advance Excel, UiPath, Automation Anywhere, Electroneek, N8N, Visual Studio Code, MS PowerPoint
- **Soft Skills** (Leadership, Problem Solving, Communication, Team Building, Presentations)

INTERNSHIP EXPERIENCE

COGNIC SYSTEM | BUSINESS INTELLIGENCE & AUTOMATION | Jabalpur [01/25 – 06/25]

• Power BI Project – Monthly P&L Analysis Dashboard

- Designed and implemented an interactive **KPI dashboard** using Power BI to provide stakeholders with real-time financial performance insights.
- Used **Power Query Editor** to perform comprehensive **ETL** operations on raw Excel datasets including data cleansing, type conversion, and structural normalization.
- Built a **data model** in Power BI by creating relationships between tables, especially linking fiscal year calendars with transaction data to enable time intelligence functions.
- Developed calculated measures in **DAX** for core financial metrics like Total Revenue, Gross Margin, EBITDA, and cost breakdowns.
- Applied **data storytelling** techniques using slicers, bookmarks, and tooltips to visualize trends in profitability across departments, processes, and client segments.
- Collaborated with cross-functional teams to align report insights with strategic financial decision-making.

• Robotic Process Automation

- Built and deployed **5+ RPA bots** using ElectroNeek to automate time-consuming, rule-based tasks across operations, contributing to significant improvements in workflow efficiency.
- Led automation initiatives for **Rhino Realty**, developing bots for processes including Lease Management (Ready to Market), Leasing Automation, Rental Applications, Guest Card Automation, and Invoice Processing integrated with the AppFolio platform.
- Supported **John Sanchez & Co.** by automating critical document-heavy workflows like **8879 Document Processing** and **SafeSend Organizer**, improving data accuracy and turnaround time.
- Collaborated in post-deployment bot monitoring and implemented robust error-handling mechanisms, reducing failure rates and ensuring smooth scheduled executions with minimal manual intervention.

ACADEMIC PROJECTS

HR ANALYTICAL DASHBOARD | SELF PROJECT |

- Built an interactive **Power BI dashboard** using a dataset of **1,470 employees** to analyze attrition by age, gender, salary slab, department, and education, empowering HR leaders with strategic workforce insights.
- Identified key attrition factors like low salary bands and specific job roles through visual analytics to support proactive employee retention strategies.

PIZZA SALES ANALYSIS – (SQL) | SELF PROJECT |

- Executed advanced SQL queries in **MySQL Workbench** to analyze a pizza restaurant's sales data, answering key business questions like total **revenue**, **peak order hours**, **top-selling pizzas**, and **size preferences**.
- Performed category-wise revenue breakdown, cumulative sales trends, and customer ordering behavior to support data-driven decision-making for operational improvements.

CERTIFICATION

- Data and Business Analytics Training - TECH TIP 24
- Data Visualization Certification – TATA/Forage
- Data Analytics certification – Deloitte/Forage
- Python for Machine Learning - Great Learning
