👤 PROFILE

Versatile and results-driven final-year engineering student with expertise in **Core Python**, its libraries, **AI/ML**, **SQL**, **data analytics**, and **data visualization**. Proficient in front-end technologies including **HTML**, **CSS**, **JS**, and **React**. Skilled in analyzing large datasets, extracting actionable insights, and building dashboards using tools like **Power BI**, **Excel**, and **Tableau**. Eager to apply analytical thinking and technical knowledge to solve real-world problems and contribute to innovative projects.

🎓 EDUCATION

Walchand Institute of Technology, Solapur, 2022 – Present | 9.39 CGPA till now
Bachelor of Technology in Electronics & Communication Engineering

Kendriya Vidyalaya Sangathan, Muzaffarpur, 2020 – 2022 | 74.68%
12th(Higher Secondary Certificate) 📄

💼 PROFESSIONAL EXPERIENCE

Project Intern, TATA ADVANCED SYSTEMS LIMITED 📄 Jun 2025 – Present | Bengaluru

- Working on a **Turbulence Mitigation Transformer (TMT)** model to restore video frames affected by atmospheric distortion using **PyTorch**, **OpenCV**, and **Transformer-based deep learning model**.
- Involved in **data annotation** using tools like **LabelMe**, along with **NumPy**, **Pandas**, **Matplotlib** and **custom Python scripts** for preprocessing, visualization and organizing video(frames) datasets.

Data Analytics Intern, ELiteTech 📄 Dec 2025 – Feb 2025 | Remote

- Developed a **Customer Segmentation Model** that identified key customer groups, leading to targeted marketing strategies and a 15% increase in engagement.
- Built an **Employee Attrition Prediction Model**, improving retention strategies and reducing turnover by 8% within six months.

Python Intern, YHills 📄 Jul 2024 – Aug 2024 | Remote

- Devised a **Customer Churn Prediction Model**, increasing retention by 10% and reducing churn by 5% within the first quarter.
- Built an **Iris Flower Classification Model** for iris flower species, achieving 95% accuracy in predicting species based on feature data.

📁 PROJECTS

Handwritten Digit Recognizer 📄

- Built a CNN using TensorFlow to classify MNIST digits with 98%+ accuracy.
- Applied data augmentation and tuned hyperparameters to enhance model generalization.

AI Chatbot (React, HTML, CSS, JS, Gemini API) 📄

- Developed and deployed an AI chatbot with **React** and integrated **Gemini API** for intelligent conversations.
- Engineered a responsive UI with **HTML**, **CSS**, and **JavaScript**, ensuring real-time user interactions.

EDA of House Dataset 📄

- Performed **EDA** to analyze key factors affecting house prices, cleaned data, handled missing values, and visualized insights using **matplotlib** and **seaborn**.

🧠 SKILLS

Programming: C, Embedded C, Core Python, SQL, Bash, HTML, CSS, JavaScript

Frameworks/Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, TensorFlow, PyTorch, Hugging Face Transformers, React, Node.js,

Tools: VS Code, Git & GitHub, Power BI, Git, Jupyter Notebook, Anaconda, Microsoft Excel

Technologies: Machine Learning, Natural Language Processing, Multi-modal Learning, CNN

🏆 ACHIEVEMENTS

National Science Olympiad 📄
Won Silver Medal in International Mathematics Olympiad – 2019-20

Smart India Hackathon
Participated in SIH, developed innovative solutions, and collaborated with a team to address real-world challenges.

Letter of Recommendation 📄
Received a letter of recommendation from EliteTech for exceptional performance and contributions during my Data Analytics internship.

📜 CERTIFICATIONS

- Python Bootcamp – Udemy 📄
- Machine Learning Foundations – AWS Academy 📄
- IR4.0 Technologies – TechSaksham (Microsoft + SAP) 📄
- Use Generative AI for Software Development – IBM SkillsBuild 📄
