Professional Summary

Detail-oriented Computer Science graduate with hands-on experience in **survey-based research**, **data analytics**, and **data visualization tools** such as Power BI and Excel. Proven track record in **data tabulation**, **predictive modeling**, and supporting **data-driven decision-making**. Skilled in tools like SPSS, SQL, Python, and Excel, with a strong commitment to quality, detail, and client-focused reporting.

EDUCATION

KL University

Bachelor of Technology in Computer Science - CGPA: 8.65

Aug 2020 – May 2024

Vijayawada, AP

TECHNICAL SKILLS

Data Analytics: Python, SQL, SPSS, Excel, Google Sheets, Power BI, Google Sheets

Statistical Tools: scikit-learn, NumPy, Matplotlib, R (basic)

Survey Tools: Jupyter Notebook (for analysis), online survey tools(basic)

Project Tools: PowerPoint, Google Slides, Git, GitHub

Familiar with: Relational databases, survey design concepts, QA processes

PROJECTS

Predictive Modeling for Classification Accuracy | *Python, NumPy, Matplotlib, scikit-learn*

January 2025

- Conducted exploratory data analysis and model development for classification with 95.4% accuracy
- Data Management and Visualization: Managed and visualized data distributions of 7,500 training images using Matplotlib, ensuring balanced class representation crucial for unbiased machine learning model training.
- Performed QA on outputs and applied dimensionality reduction techniques to optimize model runtime by 87%.
- Error Analysis and Testing: Conducted detailed error analysis and presented success/failure cases to optimize the model, providing clear insights into classifier performance and areas for improvement.
- Documented findings and methodology in structured reports using Jupyter Notebook.

Survey Data Storage & Querying Project | *MySQL, SQL*

November 2023-

- Created structured data architecture for a simulated survey-based retail study.
- Improved data retrieval performance by 30% through indexing and schema optimization.
- Generated reporting queries for cost/feasibility simulations and data validation tasks.

Interactive Dashboard & Data Visualization Project | *Power BI, DAX, SQL*

January 2025

- Developed survey-style financial tracker integrating diverse datasets via Power Query.
- Computed insights using DAX (e.g., ROI, savings rate), with clear data tabulation.
- Built interactive dashboards using slicers and filters for performance analysis.
- Emphasized clean reporting and clear visualization techniques aligned with business decision-making.

WORK EXPERIENCE

Data Analytics Intern | Access Million ([Link](#))

Aug 2024 – Feb 2025

- Contributed to real-world survey-based analytics projects and dashboard development.
- Performed QA checks, cleaned datasets, and supported sampling/fieldwork tracking.
- Built machine learning models to improve prediction accuracy by 20%.
- Collaborated across departments to ensure timely and accurate deliverables.

CERTIFICATIONS

- Azure Fundamentals (AZ-900)
- ServiceNow System Administrator
- In Progress: Google Data Analytics Certificate
