SUMMARY

Data-driven engineering student at IIIT Kottayam with experience in analyzing trends, visualizing KPIs, and building dashboards using Python, SQL, Power BI, and Streamlit. Skilled in translating business requirements into analytical solutions, and currently exploring cloud and DevOps tools to enhance end-to-end data workflows.

EDUCATION

Indian Institute of Information Technology, Kottayam

2022-Present

B.Tech - Electronics and Communication Engineering

CGPA: 8.1

St. Michael's High School

2021

Class 12 - CBSE

Percentage: 94.8

TECHNICAL SKILLS

Languages: Python, C/C++, SQL.

Libraries and Frameworks: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Streamlit, BeautifulSoup, Selenium.

Tools and Platforms: Git, PowerBI, MS Excel, Jupyter, Pickle, VS Code.

Databases: PostgreSQL, MySQL.

Other: Web Scraping, EDA, Model Deployment, API Integration.

PROJECTS

Movie Recommendation System (Content-based Filtering)

July 2025

Python, Pandas, Scikit-learn, NLP, Streamlit

- Developed a **content-based movie recommender system** using **TF-IDF vectorization** and **cosine similarity** on over **4,800 movie records**.
- Applied **NLP techniques** for text preprocessing and feature engineering to extract and analyze metadata.
- Deployed the model using **Streamlit** with **Pickle-based serialization** to improve app responsiveness and load time.

Indian Startup Funding Analysis

June 2025

Python, Pandas, Matplotlib, Numpy, Streamlit

- Built an interactive Streamlit dashboard** to analyze Indian startup funding data, enabling real-time insights across companies, sectors, investors, and cities.
- Performed end-to-end data cleaning and wrangling** using **Pandas** and **NumPy** on a Kaggle dataset (**4,000+ records**), converting raw data into structured formats for analysis.
- Designed and implemented insightful visualizations** using **Matplotlib** and **Seaborn** to communicate funding patterns, top sectors, and quarterly trends to non-technical stakeholders.

Credit Card Financial Analysis

March 2025

Power BI, PostgreSQL, DAX

- Created an interactive dashboard analyzing **10,000+ credit card transactions** to identify customer spending patterns and financial risk.
- Utilized **PostgreSQL** for backend data processing and **DAX** to implement **KPIs and custom metrics** in **Power BI**.
- Focused on **data modeling, query optimization** and **real-time analytics** for scalable business intelligence delivery.

TECHNICAL ACHIEVEMENTS

- Solved **300+ DSA problems** across **LeetCode** and **GFG** in **Python** and **C++**, building analytical depth.
- 50-day LeetCode streak (SQL and Pandas)**, reinforcing advanced data querying and transformation skills.

EXTRACURRICULAR ACTIVITIES

WildBeats – Cultural Club, IIIT Kottayam

Aug 2023 – Apr 2024

Sub-Lead

- Managed logistics and execution for **Apoorv**, the institute's techno-cultural fest, handling **1,500+ offline participants**.
- Planned and coordinated various cultural events, ensuring smooth operations throughout the academic year.
- Demonstrated **leadership, time management** and collaboration in a cross-functional student organizing team.
