EDUCATION

B.Tech

NIT Jalandhar

07/2018 - 05/2022

PROJECTS

Analyzing Housing Data in Bangalore (SQL , Power BI)

- Cleaned and structured real estate data using advanced SQL techniques to address inconsistencies and prepare for analysis.
- Built dynamic dashboards in Power BI to visualize price trends, BHK distributions, and locality-wise comparisons.
- Implemented rule-based data validation to flag anomalies in area measurements and pricing metrics.

Analyzing E-Commerce website data on Amplitude

- Processed and analyzed user interaction data to identify key behavioral patterns across the purchase funnel.
- Defined and tracked custom KPIs to gather insights on user engagement.
- Mapped multi-event journeys and reconciled session-level discrepancies using cohorting and event sequencing logic.

WORK EXPERIENCE

Product Analyst Intern

First Connect

03/2025 - 06/2025

- Analyzed marketing data and identified inefficiencies, leading to a 5% reduction in marketing spend.
- Defined and tracked product KPIs by setting up events, metrics, and dashboards using Amplitude.
- Designed and monitored A/B tests to assess feature performance and guide data-driven decisions.
- Conducted user research and surveys, translating insights into actionable product improvements.
