Summary

Insight-driven and detail-oriented Data Analyst with hands-on experience in analyzing complex datasets to generate actionable business insights. Proficient in SQL, Python, Excel, Power BI, and Tableau. Experienced in working on real-world data projects involving geospatial data, healthcare analytics, and customer behavior. Adept in leveraging cloud platforms (AWS, GCP, Azure) for data handling and collaborating cross-functionally to support strategic decisions. Passionate about translating raw data into impactful stories.

Technical Skills

Languages & Tools:	Python, SQL, R, Power BI, Tableau, Advanced Excel
Data Science:	Pandas, Seaborn, TensorFlow, ML Algorithms
Databases:	MySQL, MongoDB, SQL Server, Oracle
Big Data Tools:	Apache Hadoop, Apache Spark, Databricks
LLMs & GenAI:	LangChain, n8n
Soft Skills:	Effective Communication, Adaptability, Problem-Solving

Work Experience

Python Flask Developer

Sealink Infosys | Ahmedabad, Gujarat

Feb 2024 – May 2024

- Developed **TechMarket**, a fully functional e-commerce web application using **Python Flask** and **MySQL**.
- Built core modules including **product catalog**, **user authentication system**, and an **admin dashboard** for managing users and inventory.
- Gained hands-on experience in **backend development**, **database design**, and building **scalable web applications**.

Projects

Student Count Analysis

Tech Stack: Tableau, Excel

- Designed an interactive Tableau dashboard to analyze patterns in student lifestyle and mental health factors.
- Visualized the relationship between sleep duration, study hours, academic pressure, financial stress, and study satisfaction with overall student count.

Telecom Customer Churn Analysis

Tech Stack: R, RStudio, ggplot2

- Analyzed data from 7,000+ telecom users to find why customers leave the service.
- Used R and ggplot2 to clean, explore, and visualize data related to customer behavior and service usage.
- Found key churn factors like **month-to-month contracts**, **low tenure**, and **internet service issues**, helping suggest ways to improve customer retention.

Starbucks Coffee Sales Dashboard

Tech Stack: Power BI, Excel

- Developed a dashboard to analyze product performance, revenue trends, and customer behavior.
- Helped visualize key business KPIs for strategic insights.

Sample Superstore Sales Dashboard

Tech Stack: Tableau, Excel

- Created an interactive dashboard using Tableau to visualize key performance indicators (KPIs) from the **Sample Superstore dataset**.
- Analyzed **sales, profit, discounts, and quantity sold** across regions, categories, and customer segments.
- Used filters, maps, bar charts, and line graphs to identify top-performing products, regions with low profitability, and patterns in customer purchases.
- Delivered actionable insights to improve marketing focus and inventory management strategies.

Placement Prediction – Logistic Regression

Tech Stack: Python, Scikit-learn, Jupyter Notebook

- Built a logistic regression model to predict a student’s placement likelihood based on **CGPA and IQ scores**.
- Performed data preprocessing, model training, and evaluation using accuracy and confusion matrix.

Education

M.Sc. Big Data Analytics	July 2024 to April 2026
St. Xavier’s College (Autonomous)	Ahmedabad, Gujarat
Bachelor in Computer Application	July 2021 to April 2024
Gujarat University	Ahmedabad, Gujarat

Certification

- Python for Data Science – Start-Tech Academy
- Tableau | Power BI – Start-Tech Academy, Skill Nation
- Basic to Advanced Microsoft Excel - Skill Nation
- Deloitte - Deloitte Australia Data Analytics Virtual Job Simulation
- Looker and Looker Studio - Start-Tech Academy
