SUMMARY

Data analytics and ML professional with expertise in Python, SQL, Power BI, and statistical analysis. Skilled in data visualization, ETL, deep learning, data mining, and predictive analytics. Proficient in Django for web-based data applications. Passionate about extracting meaningful insights from complex data to drive intelligent decision-making.

EXPERIENCE

CloudLead Technologies Pvt. Ltd.

Maharashtra, India

Data Analyst Intern

Feb 2024 – June 2025

- **Dashboard Development:** Built Power BI dashboards to track monthly sales, performance metrics, and business trends for executive reporting.
- **MongoDB Operations:** Handled data modeling and aggregation in MongoDB using \$lookup and \$group for analyzing semi-structured data.
- **Data Scraping:** Created automated scraping tools using Python and SeleniumBase to extract clean, structured data from LinkedIn and web pages.
- **Data Cleaning:** Performed data preprocessing with Python by handling missing values, removing duplicates, and standardizing inconsistent formats.

Opine Group

Maharashtra, India

Data Analyst Intern

Sept 2024 – Nov 2024

- Assisted in data collection, cleaning, and analysis to support decision-making processes.
- Collaborated with cross-functional teams to understand data requirements and deliver insights.
- Performed ETL processes to transform raw data into actionable insights.
- Created visualizations and dashboards using Power BI to present findings.

SKILLS

Languages : Python, Mongo DB, SQL, R

FrameworkLibraries: Flask, Django, PyTorch, Tenserflow.

AI/ML Technologies : NLP, Classification, Regression, Clustering.

Data science and Analysis : Numpy, Jupyter Notebook, Regression Analysis.

Data Visualization : Power BI, Matplotlib, seaborn, Tableau, Google looker studio.

PROJECTS

- **Expense Analysis Project**

- Conducted an in-depth analysis of organizational expenses, including:
 - * **Monthly Expense Trends:** Analyzed and visualized monthly spending patterns.
 - * **Expense Type Breakdown:** Categorized expenses and created visualizations.
 - * **Department-Wise Analysis:** Segmented data by department and month.
 - * **Interactive Dashboards:** Utilized Power BI for dynamic dashboards.

- **Event Face Finder**

- Built a web platform using Django for finding and sharing event photos.
- Implemented secure upload and face recognition matching features.
- Developed a user-friendly frontend for photo search and retrieval.
- Ensured privacy and data security for user trust.

- **Car Sales Data Analytics**

- Conducted data cleaning for accurate car sales data.
- Utilized DAX for advanced data analytics.
- Designed interactive dashboards using Power BI.
- Analyzed trends, patterns, and outliers in sales data.
