

K PAVAN KALYAN

Bangalore, India

8074440366

k.pavankalyan366@gmail.com

TECHNICAL SKILLS

PROGRAMMING: Python, C, C++

WEB DEVELOPMENT: HTML, CSS, React.js, Node.js, Express.js

CLOUD: Microsoft Azure, AWS

DATABASE: MySQL

MS OFFICE: Excel & Word

INTERPERSONAL SKILLS

Excellent communication

Flexible

Quick learner

Problem solving

Time management

Attention to detail

ACTIVITIES & ACHIEVEMENTS

- Participated in running race and won 2nd prize at school.
- Took part and won in team sports like volleyball and kho-kho.
- Been a vice president for lower classes to look after for 3 years in school.
- Participated in seminars and presentations at school level on diverse topics. Part of radio shows that are conducted yearly in school.

LANGUAGES

English, Telugu, Tamil and Basic German.

OBJECTIVE

Motivated and industrious Computer Science graduate with a solid foundation in software development, data engineering, and emerging technologies like AI and Machine Learning. Passionate about solving real-world problems through innovative and scalable solutions. Seeking a challenging and growth-oriented role in a dynamic organization where I can apply my technical skills, problem-solving abilities, and passion for continuous learning to contribute meaningfully to the team's success and the organization's goals.

EDUCATION

B.E CSE | Sathyabama University (2020 – 2024)
7.8 GPA

Intermediate (M.P.C) | Narayana Institutions (2018 – 2020)
7.0 GPA

School (S.S.C) | Narayana Institutions (2017 – 2018)
9.7 GPA

PROJECTS

LEVERAGING CNN AND TRANSFER LEARNING FOR VISION BASED HUMAN ACTIVITY RECOGNITION

(DOMAIN - ARTIFICIAL INTELLIGENCE | TOOLS: PYTHON, AZURE, SQL, DATABRICKS)

- Developed a vision-based Human Activity Recognition (HAR) system using video and image frames from depth and IR cameras; leveraged CNNs and transfer learning to classify activities based on motion features.
- Employed Azure services including SQL Database, Data Lake Storage, and Databricks for scalable data storage, processing, and model training.
- Designed and implemented ETL pipelines using Python and Scala for data integration, preprocessing, and modelling.
- Executed SQL queries for data analysis and ensured efficient, well-structured database design.
- Contributed effectively within a team environment, demonstrating strong communication and problem-solving skills throughout the project lifecycle.

EMERGING TECHNOLOGIES IN THE REAL TIME APPLICATIONS

(DOMAIN – ML | TOOLS: PYTHON, FLASK/DJANGO, SCIKIT-LEARN, PANDAS)

- Developed a web application using Flask to deliver real-time, user-specific data.
- Developed a real-time, user-specific web application using Flask, enabling dynamic interaction through RESTful APIs between frontend and backend.
- Integrated machine learning models built with scikit-learn (e.g., Logistic Regression), using Pandas and NumPy for data preprocessing and feature engineering.
- Designed a responsive and interactive UI using HTML, CSS, and JavaScript, enabling seamless user interaction with real-time results.
- Deployed the full-stack application on AWS.

CERTIFICATIONS & WEBINARS

- Certified in CODINGO contest conducted by school of computing held in Feb 2022.
- Python programming quiz participation in 2022
- AWS: Amazon Web Services 2022

Theme: Amazon services and its future
