91%
Maharashtra Board

Career Objective

To join a team where I can apply my development skills to solve real user problems while growing with practical, production-level experience.

To learn, grow and create value for the organization

Projects

○ Bookshelf App

Tech Stack: React.js, Node.js, Express, MongoDB, Google Books API

- A full-stack MERN application where users can search, add, and review books in their personal bookshelf.
- Developed a responsive front-end using React with reusable UI components.
- Integrated the Google Books API for real-time book data and search functionality.
- Handled authentication using JWT and protected user routes.
- Deployed full stack app using Render
- GitHub: github.com/riz-100/book-shelf-project
- Deployed at: book-shelf-4.onrender.com/

○ A Dr's Professional Website

Tech Stack: React.js, Material UI

- A Responsive frontend Website with Home, About, Contact and Services page
- Material UI and CSS
- Deployed on Netlify
- GitHub: github.com/riz-100/drWebTemplate
- Deployed at: fanciful-otter-b3a35a.netlify.app/
