Rohit Singh Gusain

Bangalore, Karnataka India

Software Developer

SUMMARY

As a dedicated software developer with 1 year of experience, I aim to leverage my expertise in React.js and Nest.js to design and implement efficient, scalable, and user-friendly web applications. I am committed to continuous learning, effective collaboration, and delivering innovative solutions that align with organizational goals while enhancing user experience."

WORK EXPERIENCE

Company Name: Ops Kube Pvt Ltd, Noida

Duration: May 2024- Nov 2024

Project name: Aadesh Travels

Project description:

Aadesh Travels consistently offers some of the best airfare deals in the market. Their strong partnerships with major airlines like Air India, Vistara, Emirates. I was working on Aadesh Travel website where I have worked on Aadesh Hotel Management System. The technology which I have used was **ReactJS**, **Refine** framework, **NodeJS**, **Ant Design**, **Postgresql** and **NestJS**.

Roles and Responsibilities

- **Dashboard:** I developed the dashboard for different hotel members. It has features like hotel availability, search hotel by city name, filter date using filter feature.
- **Responsive Design with Ant Design:** Utilized **Ant Design** to create a responsive design for the platform, ensuring optimal user experience.
- **CRUD operation:** User or admin can see the different aspect such as create, read, update delete as per their perspective.
- **Worked on Backend:** For efficient and faster. I used **Nest.JS** which is the framework of **NodeJS** with strictly use of **Typescript** along with that **Postgresql** for database.

Company Name: RS Vision Pvt Ltd, Bhopal

Duration: Sep 2023- March 2024

Project name: Hannaford Farm Exchange

Project description:

Hannaford is an international leader in retail grocery known for its extraordinary commitments to diversity and inclusion, sustainability and innovation around the globe.

Roles and Responsibilities

- **Onboarding Process Development:** Designed and implemented the onboarding process for both sellers and buyers, ensuring a smooth and intuitive experience for new users. Developed user-friendly interfaces and workflows to guide users through the registration and setup process effectively.
- **Responsive Design with Bootstrap:** Utilized Bootstrap to create a responsive design for the platform, ensuring optimal user experience across devices of various screen sizes. Implemented responsive layout and components to adapt to different viewport sizes, enhancing accessibility and usability.

- Pixel-Perfect Design with **Figma**: Collaborated with designers to translate design mock-ups into pixel-perfect UI components using Figma. Ensured consistency in design implementation and adherence to design specifications throughout the development process.
- Cart Feature Development: Developed the cart feature to enable buyers to add and manage items for purchase conveniently. Implemented cart functionality, including adding/removing items, updating quantities, and calculating total prices, to enhance the shopping experience for users. Overall, my contributions as a frontend developer played a crucial role in creating a user-friendly and feature-rich platform for Hannaford Farm Exchange. By leveraging technologies like **ReactJS**, **Bootstrap**, and **Figma** I helped deliver a responsive, secure, and visually appealing solution that met the needs of both sellers and buyers in the agricultural community.

SKILLS

- **Front-end:** HTML5, CSS3, JavaScript, Bootstrap, React.js, Redux, Refine, Redux Toolkit, Tailwind CSS, Ant Design
- **Back-end:** Node.js, Nest.js, MySQL, PostgreSQL
- **Version Control & Tools:** Git, GitHub,
- **Soft Skills:** Problem-solving, Collaboration, Agile Development, SDLC, Requirement Analysis, Unit Testing
- **Tools:** Jira, Postman, Figma

EDUCATION

- Sagar Institute of research and technology - BE (Bachelor of Engineering in Information Technology) - 2015-2019 Bhopal, Madhya Pradesh.
- Bonnie Foi Co-Ed School – 12th (PCM)
2014-2015 Bhopal, Madhya Pradesh.

TRAINING AND CERTIFICATE

- Industrial Training in Internet of Things
Major Project
“The reception bot” as per the name it is a dedicated robot which works as a help desk or a reception basically for performing some common works of a receptionist and also as a personal assistant because it knows about weather, time, news, and many more things which a human don’t know directly.
