SUMMARY

Motivated Computer Science undergraduate specializing in Data Science with a strong grasp of data structures, algorithms, and software engineering principles. Skilled in Java, Python, and software development, with practical experience in academic projects and technical event coordination. Passionate about building impactful technology and eager to contribute in a software development or data-centric role.

TECHNICAL SKILLS

- **Languages:** Java, Python, C++, C, R programming
- **Tools & Frameworks:** Java Swing, Canva, VS code, Eclipse
- **Technologies:** Machine Learning, OpenCV, Power BI
- **Other Skills:** Data Structures Algorithms, Oops, MySQL, Excel

PROJECTS

Smart Vision Face Attendance System [GitHub](#) | Python, OpenCV, ML

- Built a contactless face recognition-based attendance system using Enhanced LBP, PCA, and Viola-Jones algorithm.
- Implemented robust image preprocessing and a two-phase workflow (training & recognition) for improved accuracy and enabled real-time detection with a user-friendly interface on standard laptop webcams.

Online Survey System [GitHub](#) | Java

- Developed a Java-based application to create, publish, and analyze surveys in real time.
- Implemented graphical representation of survey results for quick interpretation.

Player vs Enemy Game [GitHub](#) | Java Swing

- Designed a 2D GUI-based game where the player avoids enemy collisions.
- Used Java threads and GUI concepts to manage movements and game logic.
