PROFILE SUMMARY

I am a recent post graduate student with skills in analyzing data and finding useful information to help businesses make better decisions. I have learned tools like MS Excel, SQL, R, Power BI and Tableau during my academic program. I enjoy working with data, solving problems, and creating clear reports or dashboards. I am eager to start my career as a Data Analyst and grow my skills while contributing to a team.

EDUCATION

Kavayitri Bahinabai Chaudhari North Maharashtra University, Jalgaon	2020-2023
Bachelor's of science in Actuarial Science	CGPA : 8.53
Sardar Patel University, Anand, Gujarat	2024-2025
Master's of science in Statistics	CGPA : 5.52

RELEVANT COURSEWORK

Data Analysis	Qualitative and Quantitative Analysis	Statistical Modelling
Data Visualization	Descriptive statistics	Clinical Trials
Data Cleaning	Statistical Learning and Data Mining	Regression Analysis

SKILLS

Technical Skills

MS Excel : I can use Excel to organize data, data cleaning, , pivot tables, VLOOKUP, data visualization(by make charts), do calculation and dashboard creation for statistical analysis.

R language : Statistical modeling, regression analysis, and visualization using packages (such as ggplot2, dplyr, and caret).

Minitab : I use Minitab to check and improve the quality of data and do simple tests.

Power BI : Basically I make dashboards and reports in Power BI to show business data in a simple way.

SQL : I can write commands to get and change data, aggregation, and transformation from relational databases.

SAS : I work with SAS to manage and analyze large sets of data. Statistical analysis and report generation for datasets.

Microsoft Word & PowerPoint: Professional documentation, report writing, and effective presentation design for academic and business purposes.

Soft Skills

Like to do team work, Analytical Thinking, Problem-Solving, Communication, Teamwork, work ethic and Honest, Multi-tasking.

SEMINAR AND PROJECT

Seminar Topic

- Canonical Correlation Analysis
- Stress-Strength Reliability

Project Topic

- Title : A Statistical Analysis of the Relationship Between Field of Study VS Occupation
- Objective :
 1. There is a relationship between Education Level and Current Occupation.
 2. To analyze and identify the significant factors that contribute to an employee's decision to change occupations.
 3. Build a predictive model fit Poisson regression to estimate the number of Job Opportunities based on influencing factors.
- Skills and Tools : Data Visualization in Excel, R Language, Data Analysis.
