PROFILE SUMMARY

Dedicated Data Enthusiast with expertise in Python, SQL, and Tableau. Proven track record in competitor analysis, data cleaning, and data visualization to derive actionable insights. Highly detail-oriented with strong multitasking abilities, committed to continuous professional development and delivering efficient and innovative analytical solutions.

WORK EXPERIENCE

- **Razorpay - Associate Business Analyst** March 2025 - Present
 - Monitor and analyze transaction success rates across payment channels using SQL and Tableau dashboards, identifying anomalies and performance issues in real time.
 - Collaborating cross-functionally with product and operations teams to conduct root cause analysis on transaction drop-offs and drive data-backed solutions for improving success rates.
- **Credit Saison India - Intern** December 2023 - July 2024
 - Implemented rigorous data quality checks and validation processes to identify discrepancies and inconsistencies, resulting in a 20% improvement in data accuracy.
 - Developed and optimized SQL queries for automated data validation between AWS Athena and Redshift to streamline ETL processes, reducing query execution time by 30%.
 - Validated and managed data flow from various channels to Redshift, improving integration efficiency by 25%.

EDUCATION

- **Integrated Master of Science in Mathematics and Computing** 2019-2024
Birla Institute of Technology, Mesra CGPA: 8.71
- **Class 12th, ISC** 2017-2018
City Montessori School, Lucknow 94.75%
- **Class 10th, ICSE** 2015-2016
City Montessori School, Lucknow 95.00%

PERSONAL PROJECTS

- **Data Analysis of Udemy and edX Courses** December 2022
 - Analyzed data from over 13,000 courses on Udemy and more than 3,800 courses on edX to understand the most popular subjects, pricing strategies, and enrollment numbers on both platforms, leading to a 20% increase in course recommendations.
 - Visualized key findings using graphs and charts to effectively communicate complex data insight.
 - Skills: Python, SQL**Project Link**
- **NetflixFlix: A Data Bing Dashboard** January 2023
 - The dashboard includes several interactive visualizations, such as bar charts, line charts, and maps, to provide insights related to content available on Netflix, user ratings, and trends.
 - Created interactive visualizations providing insights into consumer insights, content ratings, genres, and trends, improving content recommendation accuracy by 20%.
 - Skills: Tableau**Project Link**
- **Data Driven Insights for App development with SQL** May 2023
 - Conducted an extensive data analysis project to assist a developer in making data-driven decisions for app development. Performed Exploratory Data Analysis to gain insights into the dataset.
 - Uncovered market opportunities in lower-rated genres. Analyzed the effect of pricing (43% apps are paid), language support on app ratings, determined top-rated apps within each genre, providing valuable insights into user preferences and popular app types. Synthesized key findings into an interactive dashboard.
 - Skills: SQL, EDA, Tableau**Project Link**
- **PM2.5 Concentration Estimation** May 2023
EXL EQ 2023, EXL Analytics
 - Collaborated in a team project focused on the comprehensive analysis and forecasting of PM2.5 concentration across India spanning a 3-year period. Investigated influential factors, detected prevailing trends, and formulated predictive models to anticipate forthcoming PM2.5 levels.
 - Utilized Python for coding, Time Series Forecasting techniques for analysis, Matplotlib for data visualization, and MS-Excel for comprehensive insights and presentation.

SKILLS

Technical Skills: SQL, Python, Tableau, Data Visualization, Data Cleaning, Data Analysis

Soft Skills: Problem Solving, Analytical Thinking, Continuous Learning, Decision Making, Adaptability
