Introduction

Passionate Software Developer skilled in Java, MySQL, REST APIs, and web development. Experienced in building full-stack applications and working with Agile methodologies. Strong in debugging, teamwork, and delivering scalable solutions.

Education

Bharati Vidyapeeth College of Engineering

Jan 2021 – May 2025

B.Tech - E&TC

CGPA: 9 / 10

Trident Public School, Muzaffarpur

April 2020 – May 2021

Senior Secondary (PCM)

Percentage: 84%

Experience

Java Intern – Avenirya Solutions Pvt Ltd

Jan 2025 – Mar 2025

- Developed Java-based backend components using Core Java, contributing to the design and functionality of real-time project modules.
- Designed and developed RESTful APIs to enable communication between application components, and tested their logic to ensure accurate data flow and functionality.
- Gained a clear understanding of the Software Development Life Cycle (SDLC) by actively participating in stages like requirement analysis, development, testing, and deployment.

Projects

Student Database Management System - (Github link - <https://github.com/riyarajput100/Student-Database-Application>)

- Developed a student management system to handle student records, enrollments, and fee tracking, ensuring accuracy and ease of data access.
- Implemented automated student ID generation to eliminate manual errors and enhance the efficiency of the registration process.
- Integrated database connectivity for storing and retrieving student data using SQL queries, enabling real-time data operations.

ATM Simulation - (Github link - <https://github.com/riyarajput100/atm>)

- Created a console-based ATM interface that allows users to perform core banking operations such as withdrawal, deposit, and balance.
- Implemented input validation and transaction logic to ensure secure and accurate user interactions within the ATM simulation.
- Used control structures like loops and conditional statements to manage repeated actions and decision-making within the ATM interface.

Assured Contract-Based Crop Selling System – Kisan Bazaar

- Developed a dynamic web-based platform that enables farmers to sell their agricultural produce directly to consumers through assured digital contracts, eliminating middlemen and ensuring fair pricing.
- Designed and implemented key functionalities including user registration and login system, crop listing by farmers, order placement by consumers, contract generation, and review/feedback system.

Skills

- **TECHNICAL SKILLS:** Java, SQL, JavaScript, HTML, CSS, MySQL, DBMS, OOPs, SDLC, Networking, Eclipse, VS Code, Git.
- **OTHER SKILLS:** Team Management, Event Management, Leadership, Communication, Problem-Solving.

Certifications:

- Java Programming for Complete Beginners – Udemy
- SQL(Basic) – HackerRank
- Java(Basic) – HackerRank

Languages:

- English (Fluent)
- Hindi (Fluent)

Interests :

- Traveling
- Crafting

Positions of Responsibility

Coordinator – Training & Placement Cell, BVUCOEP

May 2023– May 2024

- Coordinated campus recruitment drives by liaising with HR professionals and company representatives.
- Managed logistics, student schedules, and venue setup for smooth execution of placement events.
