

ROHIT M. SHELAR

ENGINEER / DATA ANALYST

+917507220793 | rms200796@gmail.com | Mumbai, MH, India | <https://www.linkedin.com/in/rohitms20>

CAREER SUMMARY

An Engineer with over 3 years of experience in data analysis, MIS reporting, and process optimization. Proficient in Advanced Excel & SQL. Proven ability to collaborate with cross-functional teams and translate business needs into data-driven solutions. Seeking to leverage analytical skills and business process expertise.

TECHNICAL SKILLS

Data Analysis | Advanced Excel | SQL | MIS Reporting | JIRA | Project Management | Requirements Analysis | Analytical Thinking | Teamwork

WORK EXPERIENCE

MIS Executive | Nostrum Fashion Pvt. Ltd.

12/2024 - Present

- Developed and maintained real-time reports and dashboards on key metrics, including sales, SOH, production schedules, and customer feedback, utilizing tools such as Excel, SQL, Power BI
- Conducted data analysis on sales & stock trends, identifying inefficiencies and providing insights that improved inventory turnover and reduced stockouts.
- Conducted gap analysis of current systems and desired outcomes, pinpointing areas for improvement.
- Engaged in customization discussions with stakeholders, gathering and analyzing requirements to develop high-quality documentation to support training efforts, helping employees fully understand new systems and procedures, including-
- Business Requirements Documents (BRDs): Captured detailed user requirements.
- Functional Specifications Documents (FSDs): outlining project scope, objectives and deliverables for the development team.
- Supported sales and marketing teams by analyzing customer buying patterns, seasonality, and promotional campaign effectiveness, enabling decision-making for product launches and marketing strategies.
- Created reports that tracked seasonal trends, customer preferences, and market changes, allowing the business to make informed decisions about product launches and promotional strategies.
- Supported the marketing department by analyzing the effectiveness of promotional campaigns, helping to refine marketing strategies for better ROI.

Data Science Intern | AI Variant

02/2023 – 08/2023

- Assisted in gathering, cleaning, and preprocessing large datasets from various sources (e.g., SQL databases, CSV files, APIs) to ensure data quality and integrity for analysis and model building.
- Visualized data through graphs and charts using libraries like Matplotlib, Seaborn, and Plotly to communicate insights to team members and stakeholders.
- Assisted in the development and implementation of machine learning models (e.g., regression, classification, clustering) using Python libraries such as Scikit-learn, TensorFlow, and Keras.
- Evaluated the performance of machine learning models using standard metrics and contributed to the development and maintenance of data pipelines to streamline data processing and model deployment workflows.

- Supported the deployment of machine learning models into production, collaborating with engineering teams to integrate models into live systems.

Junior Engineer | B. G. Shirke Const. Tech. Pvt. Ltd.

08/2022 - 12/2024

- Collected, analyzed and tracked mechanical system performance data for various on-site equipment (e.g. Tower cranes, lifts & vehicles) to improve equipment reliability in system performance.
- Produced detailed reports on mechanical performance and maintenance schedules, identifying trends and providing recommendations to reduce downtime.
- Collaborated with project managers, engineers, and contractors to ensure mechanical systems were installed and operated according to project specifications and timelines.
- Conducted gap analysis of current systems and desired outcomes, pinpointing areas for improvement.
- Business Requirements Documents (BRDs): Captured detailed user requirements.
- Functional Specifications Documents (FSDs): Outlining project scope, objectives and deliverables for the development team
- Minutes of Meeting (MoM): Summarize the meeting and ensure accountability. Keeping record of discussions, decisions, and action items from a meeting, including key points, attendees, and follow-up tasks with deadlines.
- Created clear, concise project reports and presentations for senior management, including progress updates, budget reports, and risk assessments.
- Worked with teams to implement corrective actions when mechanical system failures occurred, ensuring that issues were resolved quickly to avoid project delays.
- Conducted safety assessments to ensure that mechanical systems met regulatory standards, contributing to a safer construction site environment.

Production Apprentice | Mahindra & Mahindra

05/2020 – 09/2020

- Support the production team in the assembly, testing, and inspection of engine block & components in Engine PU.
- Maintain accurate records of production data, including inspection results, material usage, and machine performance.
- Assist in operating and calibrating gauges used for QC & CMM machines to measure the dimensions of engine components, ensuring precise and accurate measurements.
- Accurately document inspection data, including CMM results, material usage, and production performance, and report findings to the quality team.

EDUCATION AND CERTIFICATION

- Data Science Certification | ExcelR Solutions | Mumbai, MH 2022 - 2023
- Bachelor of Automobile Engineering | Mumbai University 2016 - 2020
- Diploma in Mechanical Engineering | St. John College of Engineering & Technology 2012 - 2016

PROFESSIONAL DEVELOPMENT

- Business Intelligence Specialization | Google Coursera | Mumbai 2023

PROJECTS

- **Oil Price Prediction** | Forecasting ML model for predicting crude oil prices on future dates.
- **News Authenticity** | Classification ML model for identifying false news & rumors.
- **Stock Market Analysis** | Gathering and analyzing US stock data and visualizing market sentiments.
