WORK EXPERIENCE

Job profile - **Analyst** Company Name - GKC TECH24 Limited July / 2024 - Present

- Assisted in maintaining and analyzing healthcare data related to patients, appointments, and medical expenses.
- Initiated and executed an internal SQL project to analyze hospital-level datasets, aligned with real clinical operations.
- Wrote advanced SQL queries to generate insights on patient inflow, medical expenses, hospital stay durations, and city-wise treatment trends.
- Improved internal data understanding by providing visual summaries and operational insights based on query results.
- Collaborated with cross-functional teams.
- Check and Drafted mails to customers for communication regarding project updates and data clarification

Achievement

Created SQL-based insights on hospital data, improving visibility of key metrics and supporting business decisions at GKC TECH24 Limited.

PROJECTS

Hospital Data Analytics Using SQL

Self-Initiated Project at GKC Tech24 Limited

- Designed a simulated hospital database to analyze performance metrics using SQL.
- Key insights derived:
 1. Identified top 3 departments with the highest number of patients.
 2. Calculated average medical expenses and hospital stay durations.
 3. Generated monthly and city-wise healthcare performance reports.
- Strengthened skills in SQL (GROUP BY, ORDER BY, aggregates, date functions) and healthcare data understanding.
- The project aligned directly with the data structure and needs of GKC Klinica’s real-world operations.
