

EDUCATION

B.Tech, Computer Science and Engineering
Rungta College of Engineering and Technology (RCET), Bhilai

GPA: 8.4 (Honors)
Class of 2024

CBSE Grade 12th
Delhi Public School (DPS), Vindhyanagar

Percentage: 85%
Class of 2020

EXPERIENCE

Associate Algo Developer

July'24 – Present

UltraSharp Algo Creations

- Engineered low-latency algorithmic trading pipelines for real-time data ingestion and Dockerized Zipline for scalable backtesting, achieving a 75 % reduction in execution time.
- Automated and deployed strategies via REST APIs, enabling 24/7 live trading with <100ms latency on Alpaca and Zerodha platforms.

Data Science Research Intern

May '23 – Aug '23

IIIT Naya Raipur (Project sponsored by FOOTRAX)

- Designed deep learning models (LSTM, GCN) in PyTorch and integrated OpenPose for keypoint tracking; boosted pose estimation accuracy by 18% on wearable-sensor datasets.
- Analyzed temporal patterns and visualized motion data using TensorBoard and Seaborn, supporting development of a smart athletic performance monitoring system.

Summer Intern

Jul '22 – Aug '22

National Thermal Power Corporation (NTPC), Barauni

- Assisted in grid-level monitoring via ABT-based scheduling and downtime pattern tracking across high-voltage systems, improving forecasting precision for voltage fluctuations by 20% during peak hours.
- Gained exposure to IIoT systems in Switchyard operations, focusing on control room data and smart grid transmission logic.

Data Science Research Intern(Conference Contributor)

May '22 – Jun '22

Indian Institute of Information Technology (IIIT), Allahabad

- Co-contributed to a research paper accepted at IEEE Smart Cities Symposium Berlin 2023, focused on YOLOv4-based pothole detection and Graph Attention Networks (GAL).
- Enhanced image preprocessing with OpenCV and Labelling, increasing model precision by 27%.

PROJECTS

EDA and LSTM Sentiment Analysis on Blinkit, Zepto and Jiomart Reviews

- Built Power BI dashboards to analyze product sales, delivery time, and satisfaction across 3 e-commerce apps, impacting operational KPIs tracking for 15,000 reviews.
- Trained LSTM classifier using cleaned review data, achieving 89% accuracy and a 0.9 F1-score for sentiment classification in production-grade notebooks.

Uber Ride-Sharing RTD Pipeline and Analytics Platform

- Built a real-time ride-sharing analytics pipeline to track trip patterns, peak zones, and demand fluctuations for data-driven decisions.
- Enabled automated ETL and streaming using Kafka, Spark, and Airflow; delivered business insights via BigQuery-powered Looker Studio dashboards, optimized ETL latency by 65%.

TECHNICAL SKILLS

Languages: Python, SQL, Bash/Shell, Java, C, C++

Data Analytics & Visualization: Power BI, Looker Studio, Tableau, MS Excel, Pandas, Numpy, Seaborn, Matplotlib

Machine Learning & Deep Learning: PyTorch, OpenPose, Scikit-learn, MLflow, YOLOv4, LSTM, GCN

Big Data & Pipelines: Apache Spark, Apache Kafka, Apache Airflow, BigQuery, Hadoop

Tools & Platforms: Jupyter Notebook, Google Colab, Docker, Git, REST APIs, Flask, Django, FastAPI

Database & Cloud Services: MySQL, Azure, GCP, AWS

LICENSES & CERTIFICATIONS

IBM Data Analyst Specialization
Meta Data Analyst Specialization
Google Data Analyst Specialization
Masai Data Analyst Certification
