OBJECTIVE

To obtain an entry-level position where I can grow professionally and personally while contributing to the success of the company through my dedication and willingness to learn.

EDUCATION

Savitribai Phule Pune University Pune, India

Post Graduate Diploma in Data Science and Artificial Intelligence

8.2 SGPA (FC with Distinction)

2024 – 2025

- Completed a comprehensive course in Data Science and Artificial Intelligence covering Python, machine learning, data analysis, and visualization techniques.

Institute of Management and Career Courses (IMCC) Pune, India

Masters of Computer Applications

8.0 SGPA (76 % FC with Distinction)

2022 – 2024

- Postgraduate in Computer Applications with knowledge of programming, data structures, web development, and database management.

Ness Wadia College Pune, India

Bachelors of Computer Applications

8.4 SGPA (83 % FC with Distinction)

2019 – 2022

- BCA graduate with academic experience in software programming, database management, and basic project development.

SKILLS

- Programming Language:**
Python
- Databases:**
Oracle, MS SQL Server (SSMS) – Joins, Subqueries, Views, Aggregate Functions, Stored Procedures
- Data Analytics & Visualization:**
Power BI – Power Query, Power Pivot, DAX, Data Modelling, Reports, Dashboards, Power BI Services
MS Excel – VLOOKUP, Conditional Formatting, Formulas, Power Query, Pivot Tables, Charts, Dashboards
- Libraries & Frameworks:**
Pandas, NumPy, Matplotlib – Data Manipulation, Analysis, Statistical Operations, and Visualization
- Machine Learning & AI:**
Supervised & Unsupervised Learning, Scikit-Learn, Regression, Classification, Clustering, Model Deployment Basics
- Web Development:**
HTML, CSS, Django – Form Handling, Templates, URL Routing, CRUD Operations, Basic Authentication
- Software Testing:**
Selenium Automation, Manual Testing – Test Case Writing, Bug Tracking, Locators, WebDriver
Testing Types & Concepts: Functional & Non-Functional Testing, White Box & Black Box Testing
Processes: SDLC (Software Development Life Cycle), STLC (Software Testing Life Cycle)
- Cloud Platforms (AWS):**
EC2 (Virtual Servers), S3 (Object Storage), RDS (Relational Database Service), IAM (Access Management), VPC (Networking)
- Web Scraping:**
BeautifulSoup, Selenium

CERTIFICATIONS

- Artificial Intelligence (AI) Bridge Course -NIELIT Delhi
- Software Testing & Software Development Training - QSpider Institute
- Business Analytics using Power BI and Tableau - Excelr Institute Pune

EXPERIENCE

Data Cause Analytics

Pune, India

Data Analyst Intern

Nov 2023 – May 2024

- Designed and built interactive dashboards and reports using Power BI
- Used Power Query and DAX for data transformation and business insights
- Performed basic data analysis using Python (Pandas, NumPy, Matplotlib)
- Cleaned and visualized data in Excel using Pivot Tables, VLOOKUP, and Conditional Formatting
- Connected data sources like Excel and SQL to Power BI for report automation.

PROJECTS

Cricbuzz – Transforming Cricket Data into Insights

Tools: SQL, Power BI, Excel, Google Sheets

Designed and developed a dynamic dashboard to analyse IPL player performance, aiding team selection and auction strategy. Extracted and cleaned data using SQL and Excel.

Visualized key metrics including batting (strike rate, average), bowling (economy, wickets), fielding stats, venue-wise performance, and form trends. Generated insights and modelled the ideal playing XI using Power BI filters and data visuals.

Vehicle Servicing and Maintenance Centre

Tools: Python, Django, HTML, CSS, SQLite

Created a full-stack web application with dedicated dashboards for Customers, Admins, and Mechanics. Customers could book appointments, track service progress, make payments, and give feedback.

Admins handled user management and service assignments, while Mechanics updated service status and reported part failures. Implemented role-based login and streamlined service operations.

Zomato Restaurant Data Analysis

Tools: Python (Pandas, Matplotlib, Seaborn)

Performed data analysis on Zomato's restaurant dataset to study customer dining behaviour. Identified most-rated restaurant types, common rating trends, and spending patterns.

Compared online vs. offline ratings and orders, and analysed average spending by couples. Generated insights to support Zomato's customer engagement and promotional strategies.

Sales Dashboard – Techno Company

Tools: Power BI, Excel

Developed an interactive sales dashboard to monitor key business metrics across brands (Intel, NVIDIA, Dell, etc.), product categories, and geographic regions. Tracked total sales, cost, quantity, profit, and transactions.

Included state-wise map visuals and supervisor-wise performance breakdowns. Enabled strategic decision-making through well-structured KPIs and insightful reports.
