Education

MIT World Peace University, Pune
MSc. (Data Science & Big Data Analytics)
CGPA: 8.58

April 2023 – May 2025

University of Mumbai
BSc. Computer Science
CGPA: 9.89

Sep 2020 – April 2023

Experience

Data Science Intern, JP Technologies

Feb 2025 – July 2025

- Achieved 98% scraping accuracy while automating product data extraction from Amazon.in and Blinkit using Python and Playwright.
- Managed and quality-checked over 1000+ data records using SQL and Excel before real-time ingestion into a MySQL database.
- Improved data processing speed by 40% by optimizing crawling workflows and error handling mechanisms across daily scraping jobs.
- Conducted Research on the Moondream2 LLM architecture by integrating Phi-1.5 with SigLIP.

Projects

Pneumonia Detection from Chest X-rays using Deep Learning

- Built a CNN-based classification model to detect pneumonia from chest X-ray images, achieving 93% test accuracy and 0.91 F1-score.
- Utilized a dataset of 5,800+ labeled chest X-ray images from the NIH database; applied histogram equalization and data augmentation.
- Fine-tuned a pre-trained ResNet-50 model using transfer learning and reduced overfitting via dropout and batch normalization layers.
- Evaluated model with precision-recall curves, confusion matrix, and ROC-AUC (0.94), validating clinical relevance.
- Reduced misclassification rate by 30% through hyperparameter tuning and error analysis of false negatives.
- Demonstrated potential to automate pneumonia screening and reduce diagnostic burden.
- Tools Used: Python, TensorFlow, Keras, OpenCV, Matplotlib, Google Colab

Blinkit Retail Sales Dashboard (PowerBI)

- Developed a comprehensive interactive dashboard analyzing 8,524 retail records across 12 key features, including item type, fat content, outlet size, and sales performance.
- Processed data from outlets established between 2011–2022, covering diverse outlet types and sizes across various locations.
- Performed in-depth analysis on product visibility, item weight, and sales distribution to uncover operational patterns and customer behavior trends.
- Extracted insights such as \$1.20M in total sales, \$141 average sales per item, and a 3.9 average customer rating.
- Enabled dynamic filtering and visual comparisons by outlet type, location, and rating to support data-driven business decisions.

Technical Skills

Programming: Python, R, SQL

ML Libraries: Scikit-learn, TensorFlow, Keras, OpenCV

Tools: Power BI, Tableau, Excel, VS Code, Streamlit

Databases: MySQL workbench, PostgreSQL

Concepts: GenAI, Prompt Engineering, Data Preprocessing, NLP

Certifications

- Python for Data Science - IBM
- ChatGPT for Data Analytics - Mavel Analytics
