Summary — Results-driven Data Engineer with hands-on experience in building scalable ETL pipelines, optimizing data workflows, and deploying ML models. Proficient in Python, PySpark, SQL, AWS, and Azure Data Factory. Skilled in real-time data processing and cloud-based data architecture. Actively seeking a Data Engineering role to apply analytical thinking and engineering expertise to solve business problems and deliver data-driven solutions. .

Skills

Languages: Python

Databases: Sql

Cloud : Azure (Data Factory, Data Lake), AWS

ETL & Data Tools: Apache Airflow, Docker, Pandas

Version Control: Git, Jupyter Notebook, PyCharm

Soft Skills: Teamwork, Communication, Problem Solving

Experience

Spoorti Technologies. Bengaluru, 3 Months

April 2025 – Jun 2025

Software Engineer Intern

Client: Cloth Factory

- Built backend services using Python and deployed on cloud infrastructure.
- Developed an IoT solution in ThingsBoard for monitoring textile factory operations.
- Integrated MQTT to stream real-time sensor data and automate device actions.
- Optimized IoT data flow in the TSE project by implementing asynchronous event handling.

Browsejobs Pvt. Ltd. Bengaluru, 6 Months

Jun 2024 – Dec 2024

Data Engineer Intern

- Assisted in building ETL pipeline to extract, clean, and load large volumes of structured data.
- Wrote and optimized SQL queries to support faster data access and reporting.
- Contributed to real-time data processing using Apache Spark and supported cloud-based workflows.
- Improved SQL performance through indexing and query tuning, achieving 40% faster execution.

Education

Malnad College of Engineering, Hassan

May – 2024

B.E, Computer Science And Engineering

CGPA : 6.7

Dacg PolyTechnic

Sep – 2021

Diploma, Computer Science And Engineering

Percentage : 80

Projects

Zillow Data Analytics

- Built an ETL pipeline using Python to extract, transform, and load Zillow real estate data.
- Extracted insights on pricing trends, user engagement, and sentiment using analytical techniques.
- Built dashboards and visualizations to support marketing and investment decisions.
- Applied data transformation, filtering, and integration across multiple sources for clean reporting.

Social Media Data Analytics

- Built a Python-based data pipeline to collect and process data from multiple social media platforms.
- Cleaned and transformed unstructured content for further analysis and reporting.
- Performed sentiment analysis and measured user engagement to uncover key content insights.
- Designed interactive dashboards to visualize trends and support marketing decisions.

Certifications

- AWS Data Engineer Foundation - AWS
- Data Engineer- Browsejobs
- Python- hackerrank

Achievements

- Completed data analytics projects using Python, SQL, and dashboards with real-world datasets.
- Built a LinkedIn audience of 8K+ by consistently sharing educational content on Data Engineering and career growth.
- Earned certifications from Cisco (Python, Data Science) and NPTEL–IIT Kharagpur (Emotional Intelligence, Soft Skills).
- Represented college in Inter-Zonal Kho-Kho, demonstrating strong teamwork and athletic discipline.
