Professional Summary

Aspiring Data Analyst with hands-on experience in data preprocessing, exploratory data analysis (EDA), data visualization, and predictive modeling. Proficient in Python, SQL, Power BI, and Excel. Skilled in transforming raw data into actionable insights using tools such as Pandas, Seaborn, Matplotlib, and Scikit-learn. Passionate about using data-driven decision making to solve real-world problems in business and technology.

Technical Skills

Programming: Python, SQL, Java, JavaScript, HTML/CSS, TailwindCSS
Data Science: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, SciPy, Streamlit
Data Visualization: Power BI, DAX, Excel, KPI Dashboards, Charts, Slicers
Tools/Platforms: Jupyter Notebook, VS Code, Git, GitHub, AWS
Databases: MySQL, PostgreSQL

Projects

HR ANALYTICS | Project Link

- Engineered features and applied **Label Encoding** to prepare data for machine learning models.
- Built and evaluated a **Random Forest Classifier** to predict employee attrition with an accuracy of over 85%.
- Interpreted feature importance to identify critical variables like **OverTime**, **JobSatisfaction**, and **DistanceFromHome**.
- Conducted exploratory data analysis (EDA) using **Seaborn** and **Matplotlib** to identify key factors influencing attrition.

Sales Prediction Web App | Project Link

- Developed a Linear Regression model using Scikit-learn to predict product sales based on TV, Radio, and Newspaper advertising budgets.
- Built and deployed a Streamlit web app allowing users to input custom marketing spends and get real-time sales predictions.
- Tech Stack:** Python 3.11+, Scikit-learn, Pandas, NumPy, Streamlit, Jupyter Notebook

Campus Placement Analysis Dashboard | Project Link

- Built an interactive dashboard using **Power BI** to analyze campus placement trends across 10,000 student records.
- Performed data cleaning and transformation to handle missing values and prepare data for visual analytics.
- Created KPI cards and visualizations to monitor average IQ, CGPA, communication skills, and placement rates.
- Used **DAX** to create calculated columns and measures for advanced insights such as placement ratio and averages.

Education

Punjab Technical University

B.Tech in Computer Science, CGPA: 7.69

Jalandhar, India

Amar Memorial St. George's Prep School

Intermediate, Percentage: 74.6%

Varanasi, India

Certifications

• Data Science – Dr. Reddy's Foundation, Marathahalli

Learned Python, data wrangling, EDA, and machine learning on real-world datasets through hands-on training.

• Data Analyst – Udemy

Mastered Excel dashboards, SQL joins aggregations, and Python libraries for data analysis and visualization.

• Core Java – Anudip Foundation

Built Java applications using OOP principles (inheritance, encapsulation) and Hibernate ORM.
