CAREER SUMMARY

Experienced in project operations and fiber deployment, with a focus on documentation, reporting, and stakeholder coordination. Skilled in tracking SLAs, compiling data, and supporting regulatory compliance. Proficient in Excel, PowerPoint, and Power BI. Known for delivering clear communication, structured analysis, and timely support across cross-functional teams.

EXPERIENCE

BT(Openreach) | *Fiber Network Delivery Engineer*

December 2023 – Present

- Acted as a primary point of contact for customer communications throughout fiber network deployment, ensuring technical support and service coordination met expectations.
- Collaborated across planning, regulatory, and customer service teams to streamline service delivery and enhance operational flow.
- Provided desk-based support to field engineers, guiding installation procedures and troubleshooting to resolve client concerns efficiently.
- Managed vendor and stakeholder coordination, maintaining service quality and transparency across all parties involved.
- Monitored service progress, escalated issues proactively, and ensured milestones were met within project timelines.
- Adapted communication strategies to address client needs effectively, building trust through clear and timely updates.
- Maintained detailed operational records and supported strategic planning by analyzing workflow and resource requirements.

TECHNICAL SKILLS

- Tools: Google Sheets, MS Excel, Power BI
- Databases: SQL
- Other Skills: Client handling, Vendor coordination, Problem-solving, Escalation Management, Communication

PERSONAL PROJECTS

Mobile Sales Performance Power BI Dashboard | *Power BI, Data Modelling and Cleaning* ,DAX | [LINK](#)

- Created an interactive dashboard in Power BI to analyze mobile sales trends, top-performing models, and regional performance
- Applied data modeling and DAX to build dynamic KPIs, slicers, and geographic visuals for strategic insights
- Enabled data-driven decisions by highlighting customer satisfaction metrics and sales distribution patterns

Road Accident Details Excel Dashboard | *Excel, Data Modelling and Cleaning* | [LINK](#)

- Built an interactive Excel dashboard to compare road accident casualties across 2021 and 2022
- Segmented data by severity, vehicle type, road conditions, and area for targeted analysis
- Delivered actionable insights and trend visuals to support road safety strategies and highlight high-risk factors

CERTIFICATION

- Introduction to Data Analysis using Microsoft Excel By Coursera | [LINK](#)
- SQL for Beginners By Simplilearn | [LINK](#)
- Power BI for Beginners By Simplilearn | [LINK](#)
- Google Sheets By Simplilearn | [LINK](#)

EDUCATION

Calcutta Institute Of Engineering And Management

2019– 2023

Bachelor of Technology - Information Technology
