Professional Summary!

AI Prompt Engineer with 8+ months of experience optimizing prompts for large language models. Skilled in NLP, machine learning, and human-AI interaction. Improved model accuracy by 35% through prompt optimization. Experienced in cross-functional collaboration and developing multimodal AI systems.

Skills

Prompt engineering and optimization, Large Language Model Architecture (LLM), Model Training and Response analysis, Python programming for AI/ML, Creative Problem solving, Version Control (Git) and collaborative tools, Data handling: Pandas, NumPy, SQL
Technical Documentation.
C++, Python and Data Structure.

Education

Bachelor of Technology Computing Science Engineering May 2020 - July 2024
Bundelkhand Institute of Engineering and Technology. Jhansi

Experience

AI Prompt Engineer, Scale Lab – Outlier AI | [🔗](#) March 2024 – Dec 2024

- Complete coding tasks were performed, including prompt development, response analysis, and optimization.
- Improved code quality and project consistency by 30% through systematic evaluation and adherence to research standards.
- In-depth research on specific technical topics to support project goals.
- Created a test case generation tool that creates random XML docs from XML Schema
- Spearheaded the development of a groundbreaking multimodal AI prompt engineering system, integrating visual, auditory, and textual inputs, leading to a 40% improvement in AI-generated content quality.

Front-end Developer Intern, Remote iNeuron AI | [🔗](#) May 2023 – July 2023

- Designed and developed a scalable shopping cart prototype using React with TypeScript, React hooks, React Context, and Styled Components, enhancing technical skills and understanding of project lifecycles.
- Implemented product addition/removal, filtering by size via Context API, and responsive design for optimal user experience across devices, These APIs made the system more feature rich by 3%.
- Designed the system architecture and integrated Google Firebase for secure hosting, backend services, and real-time updates.

Projects

Extension Tool API Project

- Developed the Extension Tool API project to evaluate and optimize API tools for video search, location services, bookings, and content summarization, enhancing accuracy and performance. Analyzed API functionality, identified issues, and recommended improvements to boost user satisfaction.

- Tools Used: API, Data Analysis, Data Extraction and Performance Optimization.

Multiple Disease Predictor

- Developed "Medi Predict," a robust machine learning model designed to predict multiple diseases simultaneously, significantly enhancing diagnostic accuracy in healthcare. By leveraging data-driven techniques, the model reduces misdiagnosis rates and improves patient outcomes through early detection.
- Tools Used: Python, scikit-learn, TensorFlow, and Kaggle.

Accomplishments

PostgreSQL Certification: Become an SQL developer course from Simply Learn (SkillUP). [↗](#)

Paid Subject expert, solving doubts related to Computer Science coursework at CHEGG India Pvt Ltd. [↗](#)

FOSSASIA Summit 2022 Cloud Skills Challenge and earned certification from Microsoft and FOSSASIA helped strengthen my cloud fundamentals and practical understanding. [↗](#)

Secured 524th global rank in Global Coding Challenge 2024 organized by TCS CodeVita 2024. [↗](#)
