OBJECTIVE

Driven Computer Engineering undergrad seeking internship opportunities in data engineering and analytics to solve real-world problems, drive impact through KPIs, and contribute meaningfully to data-powered innovation.

EDUCATION

DJ Sanghvi College of Engineering, Btech in Computer Engineering 2023-Present
(Honors in Data Science)

Current CGPA: 8.59

BSM College 2021 - 2023
HSC

Billabong High International School 2012 - 2021
ICSE

Member of School Senate

SKILLS

Languages	Python, SQL, C, CSS, HTML
Data Engineering Concepts	ETL/ELT, real-time streaming, pipeline orchestration, data cleaning and wrangling
Big Data and Streaming	Apache Spark, Kafka, Solace PubSub+
Data Analytics	SQL querying, Pyspark, Pandas, Numpy, Matplotlib, Seaborn, Streamlit
Tools and Platforms	Databricks, Airflow, Power BI, Github, Google Colab, MS Excel, Google Sheets

EXPERIENCE

Summer Intern June 2025 - Ongoing
Solace *Hyderabad, India (Remote)*

- Developed data pipelines for high-volume ingestion using Solace PubSub+ for real-time streams and PySpark on Databricks processing datasets exceeding 8M rows.
- Transformed and joined multi-source datasets (8M+ rows) using PySpark and SQL; generated feature sets improving delay prediction accuracy by 12%
- Completed official Solace trainings, enhancing understanding of event-driven architectures and optimal use of Solace PubSub+ for reliable messaging.

PROJECTS

Real-time Healthcare Monitoring System — *Kafka, Apache Spark (Structured Streaming), Airflow, Databricks*
(Ongoing)

Built a Kafka+Python based real-time pipeline simulating approximately 5,000 patient vitals per minute; implemented anomaly detection logic with <2s latency and improved early detection accuracy by 15%. Aims to demonstrate real-time processing, fault tolerance, and streaming analytics in a healthcare context.

BookNest — *ReactJS, Tailwind CSS, Figma, Django, PostgreSQL, SQLite*
(Jan 2025- June 2025)

Built a full-stack web platform with advanced PostgreSQL/SQLite database to manage user profiles, book catalogs, and community dynamics (reviews, fanart). Implemented social features like sharing, commenting, and user profiles to enhance interactivity. Developed a year-end feature inspired by 'Spotify Wrapped'.

EXTRA-CURRICULAR ACTIVITIES

- UI/UX Mentee at **DJ Unicode**
- Vocal Artist at **DJS Beats**
