## SUMMARY

Aspiring Data Analyst with a strong foundation in Python, SQL, and statistics, along with hands-on experience in Excel, Power BI, and Tableau. Skilled in extracting insights from data, and communicating results clearly. Passionate about solving business problems through data-driven decision making.

## EDUCATION

2020 – 2024

 BTech. Computer Science Engineering Data Science - **NIET College**, Greater Noida.

## EXPERIENCE & PROJECTS

**Analytics Shiksha**

*Data Analytics*

June 2025 - Current

- Applied Python and statistical methods (ANOVA, Chi-square, T-test) to analyze business problems across domains.
- Built interactive dashboards and automated reports using Power BI to analyze business performance and derive strategic insights.
- Utilized SQL extensively for data extraction, transformation, aggregation, joins, and window functions for business analytics projects.
- Built dashboards and pivot tables using Google Sheets and advanced formulas (VLOOKUP, COUNTIFS, SUMIFS).

**Road Lane Line Detection**

*Project | Python, OpenCV, NumPy, MatpotLib, TensorFlow*

March 2024 - June 2024 [Link](#)

- Developed a computer vision system to detect road lane lines in images and video feeds using OpenCV.
- Applied Canny edge detection and region masking to isolate relevant areas in the frame.
- Enhanced visualization using the Matplotlib/OpenCV GUI for frame-by-frame lane overlay.

## SKILLS

|                               |                                                                                                                                                                                                                                          |
|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Languages & Toos              |  Python, SQL, Git                                                                                                                                     |
| Data Analysis & Visualization |  Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau                                                                                                |
| Machine Learning & Statistics |  Regression, Clustering, Hypothesis Testing, A/B Testing, Correlation, p-value                                                                        |
| Misc.                         |  Data Structures and Algorithms(DSA), Database Management System(DBMS), Object-Oriented Programming(OOP), Computer Networks(CN), Operating System(OS) |

## Achievements and Certifications

### CERTIFICATIONS

- 2024
-  Smart Analytics, Machine Learning and AI. (Google Cloud) [Link](#)
-  Data Analytics and Visualization Job Simulation. (Accenture) [Link](#)
-  Data Science (Internshala) [Link](#)
