Professional Summary

Data enthusiast with internship experience in AI/ML and Python development, skilled in transforming raw data into actionable insights. Proficient in Power BI, SQL, and Python, with a focus on building dashboards, optimizing queries, and uncovering trends to drive business growth and efficiency.

Experience

AI-ML Internship

Jan 2025 - Mar 2025

AICTE-Eduskills in collaboration with Google

- Implemented supervised, unsupervised, **machine learning** algorithms using Python libraries.
- Implemented and fine-tuned **convolutional neural networks (CNNs)** using **Keras** and **TensorFlow** to enhance image classification accuracy, and utilized **Scikit-Learn** for data preprocessing and model evaluation.

Python Programmer

April 2024

TechnoHacks EduTech

- Developed a password generator, calculator, and temperature converter using **Python libraries**.
- Wrote clean, efficient, and modular code following **best programming practices**.
- Applied problem-solving skills to translate real-world tasks into functional **Python** programs.

Projects

Vendor Performance Dashboard ([Code](#))

- Created an interactive **Power BI** dashboard to spot **low-performing brands, vendors** requiring marketing focus.
- Displayed **KPIs including Total Sales, Total Purchase, Gross Profit, and Profit Margin** to enable quick performance assessment.
- Visualized **top-performing brands and vendors by sales volume** and evaluated the **purchase contribution of key vendors** in growth of business.
- Developed **ETL pipeline using Python and SQL** to transform raw sales data into a structured format.
- Implemented **CTEs (Common Table Expressions)** to **optimize SQL queries** for efficient data processing.

Zepto Grocery - Sales Dashboard ([Dashboard](#))

- Created an interactive **Power BI** dashboard using Zepto's grocery dataset to display key metrics such as **Total Sales, Average Sales, Average Rating, and Item Count** based on Fat Content, Outlet Size, Establishment Year, Location, and Item Type.
- Identified **sales trends and outlet performance patterns**, helping to improve understanding of category-wise sales and support **smarter business decisions**.
- Used efficient **DAX formulas** to make the dashboard faster.

Sickle cell disease detection

- Trained deep learning models, including **VGG-19** and **MobileNet**, achieving classification accuracies of 90.57% and 96.86%, respectively.
- Performed ablation studies by integrating **Support Vector Machine (SVM)** and **Random Forest (RF)** classifiers, increasing model accuracy to 97.46%.
- Contributed to **research paper documentation**.

Technical Skills

Languages/Libraries: Python, SQL, Pandas, NumPy, Matplotlib, JavaScript, Core Java, HTML, CSS

Databases/Cloud: MySQL, Oracle, MongoDB, AWS

Developer Tools: Power BI, Tibco Spotfire, Git/GitHub, Visual Studio, Power point, Advance Excel

Other: DAX, Power Query, Data Cleaning, Data Visualization, Data Modeling, Data validation

Achievement

- Winner of Code Marathon**, a national-level event organized by ADCET.
- Achieved a **5-Star SQL** proficiency rating on **HackerRank**.

Certifications

Python for Data Science

NPTEL, IIT Madras

Data Visualisation: Empowering Business with Effective Insights

Forage (Tata)

Education

Annasaheb Dange College of Engineering and Technology

B.Tech (Computer Science and Engineering)
