PROJECTS

AWS Cloud Infrastructure Deployment

- Designed and deployed a multi-tier web application on AWS using EC2, S3, RDS, and IAM.
- Configured a highly available and scalable environment using Auto Scaling Groups and Load Balancers.
- Implemented infrastructure as code using Terraform to automate deployment.
- Monitored performance and logs using AWS CloudWatch and set up alerts for resource thresholds.

Safe Route - AI and IOT based Fire evacuation system

- Created **AI and IOT** based fire evacuation system for smart buildings.
- Contributed in this project with my **IOT** and **SQL** skills.
- Developed the website on hosting platform **Netlify**.

Parkinson's Disease Detection

- Developed Web application using Machine Learning. It performs early detection of **Parkinson's disease** through the analysis of **spiral drawings**, **voice samples** and **Gait Dataset**.
- Advanced algorithms such as CNN and voice features like Jitter and Shimmer are utilized to implement these 2 features and are together integrated in 1 application
- The application enhances the accuracy and reliability of Parkinson's disease detection.
