

SARTHAK SANTOSH LATE Data Analyst

📍 Ahilyanagar, India 📞 9322550578 ✉️ latesarthak05@gmail.com 🔗 [linkedin.com/in/sarthak-late-5a0407252](https://www.linkedin.com/in/sarthak-late-5a0407252)

PROFILE SUMMARY

Detail-oriented and motivated individual with a data science certification, eager to leverage technical skills in data analysis, visualization, and reporting to contribute to business growth in a dynamic environment. Aspiring data analyst with expertise in statistical analysis and proficiency in Python, Excel, and PowerBI, PostgreSQL, looking for an opportunity to optimize data processes and generate actionable insights for business improvement.

EDUCATION

Bachelor of Science (Data Science) Savitribai Phule Pune University	2025
HSC Shri Kolaidevi Junior College, Kolgaon (MSBSHSE)	2022
High School Shri Khandeshwar Madhymic Vidyalaya, Kothul (MSBSHSE)	2020

TECHNICAL EXPERTISE

Programming Languages • R Programming • Python Programming	Database Management • PostgreSQL	Data Visualization Tools • Tableau • Power BI	Tools & Software • Microsoft Word • Excel • PowerPoint

PROFESSIONAL EXPERIENCE

Data Analyst as IT intern/trainee SEPIA INNOVATIONS Pvt. Ltd Sepia Innovations is a tech company focused on delivering customized IT solutions, including mobile and web development, UX/UI design, and cloud engineering services. The company, established in 2020, operates with teams in Japan and India. Real-Time Road Damage Detection and Analytics System . • Developed an end-to-end road defect detection system • leveraging YOLOv8 and YOLOV5 models to identify potholes, cracks, and other surface anomalies from road videos. • Integrated GPS data to map detected defects and visualize them interactively for actionable road maintenance insights. • Created a Streamlit dashboard to present real-time analytics, including defect counts, location heatmaps, and image-wise tracking. • Utilized OpenCV for video frame extraction and preprocessing,Roboflow for dataset management and labeling. • Automated the workflow using Python on Google Colab, improving detection efficiency and supporting data-driven decision making in road safety	May 2025 – Jun 2025

PROJECT

Smart Farming Assistant: AI & IoT for Sustainable Agriculture <i>Description: The Smart Farming Assistant leverages AI, IoT, and Data Analytics to drive the next evolution in agricultural innovation.</i> • Led the integration of IoT, AI, drones, and robotics to drive environmental sustainability, leveraging advanced technologies like Retrieval-Augmented Generation, NLP, Scikit-learn, and Weather APIs. • Achieved an 80% success rate in delivering AI-driven responses for farming-related inquiries
Email Spam Classifier <i>Description: Built an email spam classifier using NLP, Python In Jupyter Notebook with high accuracy in detecting spam messages.</i> • Designed and implemented a spam detection model using Python in Jupyter notebook to the Performed exploratory data analysis to identify key patterns in spam vs. ham emails. • Trained and evaluated multiple classifiers, optimizing for accuracy and precision. Visualized results and confusion matrix to interpret model performance.
Analysis of Forest Cover in India: Trends, Classification, and Environmental Impact <i>Description: Performed a comprehensive analysis of forest cover trends in India using data from the Forest Survey of India.</i> • Developed visual data insights by leveraging Excel, Tableau, and other tools to analyze and compare key trends between 2019 and 2021 • Cultivated strong competencies in collaborative teamwork, professional report development, and effective presentation delivery
