ACADEMIC DETAILS

Guru Tegh Bahadur Institute of Technology | B.Tech (ECE)

09/2020-06/2024

- **Subjects:** Digital Signal Processing, VLSI Design, Microprocessors and Microcontrollers, Wireless Communication, Antenna and Wave Propagation, Embedded Systems, Analog and Digital Communication, Control Systems, Artificial Intelligence and Machine Learning, Robotics

CGPA: 9.0/10

EXPERIENCE

PlanetSpark | Business Analyst

Google Sheets/Excel, SQL, Python, JIRA, Metabase, Power BI

09/2024-present

- Automated Google & Facebook Ads data using n8n, connected to DB for direct query-based insights.
- Built dashboards analyzing 250+ metrics, helping cut **100+** ads and save **\$1M** in ad spend.
- Analyzed academic and operational data to identify inefficiencies and recommend data-driven improvements in student and counselor processes.
- Gathered business requirements, documented workflows, and facilitated dashboard adoption through regular Scrum meetings and sprint planning.
- Worked extensively with **K12 academic data** across grades, subjects, and regions to identify learning trends, improve counselor targeting, and optimize student onboarding flows.

Qurex | Business Analyst and Project Manager

Project Management, Google Sheets/Excel, SQL, Python, JIRA, Leadsquared, Google Looker Studio, Power BI

06/2024-08/2024

- Managed 5 cross-functional projects end-to-end, leading a team of **5** developers, **2** QA testers, and **2** UI/UX designers, ensuring **100%** on-time delivery through agile sprints and effective stakeholder coordination.
- Optimized CRM workflows and lead qualification logic, resulting in a **35%** boost in lead conversion and **20%** reduction in CAC through process automation and strategic inputs.
- Developed **18** dynamic reports and dashboards, driving a **25%** increase in data transparency and empowering senior leadership to make informed strategic decisions.

InFeedo|Business Analyst Intern

Excel, Salesforce, SQL, Power BI, Rattle, Salesforce Analytics

06/2023-05/2024

- Analyzed **50+** datasets to uncover insights, producing **20+** accurate reports and dashboards for stakeholders.
- Reduced errors by **30%** through data cleansing efforts and improved efficiency by **20%** in data integration processes.
- Developed performance dashboards, enhancing visibility by **15%** and implemented an Early Warning System, reducing lead leakages by **10%**.
- Supported QA for reports, improving data accuracy and reliability

PROJECTS

Google Play Store Apps Analysis

- Implemented a Python-based data pipeline, reducing data errors by **25%** through rigorous cleaning, deduplication, and outlier removal.
- Leveraged statistical analysis and visualization (Seaborn, Matplotlib) to identify key trends in app ratings and reviews, enhancing data-driven strategies.

Adventure Works Retail Dashboard

- Optimized data quality by cleaning and transforming datasets in Power BI, ensuring accurate and reliable reporting.
- Designed and developed a comprehensive data model and dashboard, enabling real-time insights and supporting informed decision-making.

Crypto Currency Analysis

- Engineered robust data pipelines using Python and SQL to aggregate, clean, and validate cryptocurrency data from multiple exchanges, ensuring high data accuracy.
- Designed and deployed an interactive Power BI dashboard, providing real-time visualizations of critical market metrics to support strategic decision-making.

TECHNICAL SKILLS

- **Languages:** Python (Pandas, Seaborn, Matplotlib), SQL, R, Scripts
- **Tools:** Power BI, Excel/Google Sheets, SQL, Python (Pandas, Seaborn, Matplotlib), JIRA, Metabase, Confluence, Salesforce Analytics, Google Looker Studio, Power Query Editor, MySQL, Microsoft Office Suite, Google Analytics,
- **Skills:** Data analysis & visualization, Scrum Planning, Agile Methodology, project management, data modeling, customer relationship management, data-driven decision making, technical documentation, PRD, BRD, API integration

CERTIFICATIONS and RESEARCH PAPER

- **Google Data Analytics Professional Certificate:** Coursera, **Microsoft Power BI Desktop for Business:** Udemy, **MySQL for Data analysis:** HackerRank
