Summary

B.Tech Graduate in Artificial Intelligence and Data Science, with strong programming skills in Python and SQL, and hands-on experience in data analytics, Power BI, and automation tools like Power Apps and Power Automate. Skilled in solving real-world problems through digital transformation and data-driven insights. Demonstrates strong analytical thinking, teamwork, and leadership through internship and project work. Committed to continuous learning and eager to contribute effectively in a dynamic data or technology-focused environment.

Education

Dr. D. Y. Patil School of Science & Technology

BTech in Artificial intelligence and Data Science

Dec 2021 – May 2025

CGPA: 9.00/10.0

Vidya Valley Jr. College

Higher Secondary Certificate (HSC)

July 2019 – Jun 2021

Percentage: 78.67/100.0

Technical Skills

Data Analytics skills: Data cleaning & preprocessing, Data visualization (Power BI, Tableau), SQL for Data Querying, MS Excel, Statistical Analysis, Report and Dashboard Creation.

Programming: C++, Python

Tools/Software: Power BI, SQL, Power Automate

Language: Marathi, Hindi, English

Experience

IT Sales Intern, Mercedes Benz India – Pune

April 2024 – July 2024

- Built automated workflows using Power Automate to streamline manual processes
- Built Power Apps to digitize tasks and boost efficiency
- Created digital approval forms with Power Apps to replace Excel-based requests
- Automated email notifications and follow-up reminders, improving internal communication
- Assisted in mapping existing workflows, identifying steps for automation and optimization
- Documented technical processes and prepared user guides for non-technical staff

Website Designing Intern, Saturn Web Media - Pune

June 2023 – Aug 2023

- Worked on Photoshop, WordPress website designing, HTML website designing.
- Worked on On-page SEO, Off-page SEO, Website optimization.
- Designed and customized WordPress websites, including themes, layouts, and responsive elements
- Created website banners and graphics using Photoshop for visual consistency and branding
- Built HTML/CSS based websites from scratch, ensuring mobile responsiveness and clean UI
- Performed on-page SEO (meta tags, headings, image alt text) to improve search engine visibility
- Executed off-page SEO strategies including backlink creation and directory submissions
- Optimized site performance by compressing images, minifying code, and reducing load time
- Collaborated with the digital marketing team to align content and SEO strategies

Projects

Asthma Prediction Using Deep Neural Networks

2025

This project focused on early asthma risk prediction using a feedforward neural network (FNN) developed in TensorFlow/Keras. The aim was to build a reliable deep learning model by preprocessing real-world health data and addressing class imbalance challenges for improved prediction accuracy.

- Pre-processed data using **MinMaxScaler** and handled class imbalance with **RandomOverSampler**
- Built and trained a **deep neural network** model, tuning hyperparameters for better performance
- Achieved high accuracy and strong F1-score; evaluated results with **confusion matrix** and **ROC-AUC**
- Visualized model performance and learning curves using **Matplotlib** and **Seaborn**
- Gained practical experience in **healthcare analytics, deep learning, and model evaluation techniques**

Sales Dashboard Using Power BI

2025

Created an interactive and dynamic Power BI dashboard to monitor and evaluate sales performance across regions, products, and categories. The dashboard enabled users to gain actionable insights through visual analytics and custom filtering.

- Cleaned and transformed raw sales data using **Power Query Editor**
- Created calculated fields and KPIs using **DAX** (e.g., Total Sales, Profit Margin, YoY Growth)
- Used **slicers and filters** to allow dynamic interaction and drill-down analysis
- Designed **visual dashboards** with charts, maps, and cards for easy executive-level reporting
- Ensured responsiveness and optimized performance for large datasets in Power BI
