EDUCATION

- Sreenivasa Institute of Technology and Management Studies** Tirupati, India
Bachelor of Technology - Computer Science; GPA: 8.72 Dec 2021 - May 2025

SKILLS SUMMARY

- Programming languages** : python, R Language, **HTML**, CSS.
- Databases** : **MySQL**, MongoDB, **Hadoop**.
- Technologies** : **PoweBI**, Tableau, MS Excel, .
- Platforms** : **Linux**, Web, Windows,**AWS**.
- DevOps** : **AWS** (working towards AWS Cloud Practitioner Certification).

EXPERIENCE

- Main flow Services** Remote
Data Science Internship July 2024 - Aug 2024
 - Developed and deployed **machine learning models** using **Python**, improving **predictive accuracy** by 20% and enhancing **business insights**.
 - Executed complex **data analysis** and **predictive modelling**, uncovering actionable trends that led to a 15% increase in **operational efficiency**.
 - Collaborated with a team to design and implement **data-driven solutions**, reducing project **turnaround time** by 25% and streamlining **processes**.

PROJECTS

- Medicine Search Engine (MSE)** Jan 2024 – Mar 2024
 - Description:** A web-based application that allows users to search for medicines and view their availability, cost, and nearby pharmacy locations. Designed to enhance patient access to medications, especially in emergencies. The system streamlines the search process for essential drugs by aggregating data from multiple pharmacies. It ensures timely access to accurate information, aiding in faster decision-making during critical situations.
 - Tools & Technologies:** Python Flask, HTML, CSS, JavaScript, MongoDB
- Dynamic Question Paper Generator using NLP** Jan 2025 – April 2025
 - Description:** A web-based system that automates the generation of question papers using Natural Language Processing techniques. Designed to reduce manual workload for educators by intelligently selecting and assembling questions based on topics, difficulty levels, and Bloom’s Taxonomy. The system ensures balanced question papers, promotes topic coverage, and minimizes repetition, enhancing fairness and efficiency in assessments.
 - Tools & Technologies:** Python, NLP (NLTK/spaCy), Flask, MongoDB, HTML, CSS

CERTIFICATES

- Web Development Internship** 2024
Offered by: Octanet Services Pvt Ltd
- Data Science with Python Internship** 2024
Offered by: Main Flow Services and Technologies Pvt. Ltd
- Data Representation and Visualization in Tableau** 2023
Offered by: Rochester Institute of Technology
- Big Data, Hadoop, and Spark Basics** 2023
Course of Study Offered by: IBM

HOBBIES AND INTERESTS

- Cricket:** Passionate about playing and watching cricket, analyzing game strategies.
- Technology:** Exploring emerging tech trends, AI, and data science advancements.
- Reading:** Enjoys reading books on self-improvement, history, and technology.
- Music:** Loves listening to music and exploring different genres.
