

Work Experience

- DATA SCIENCE INTERN– INTERNSHALA –India

September 2024-February 2025

 - Optimized student performance in the Placement Guarantee Course (PGC) for Data Science by analyzing performance data and identifying trends, resulting in actionable insights for curriculum improvements.
 - Leveraged data analytics to enhance course engagement and student outcomes, directly contributing to course content recommendations and adjustments based on performance metrics.
 - Conducted mock technical interviews simulating real-world job scenarios, effectively improving student confidence, job readiness, and their interviewing skills in a high-pressure environment.
 - Collaborated with cross-functional teams to streamline the learning experience, using data-driven strategies to drive increased enrollment and student satisfaction.
- DATA SCIENCE INTERN– CODSOFT –India

July 2024-August2024

 - Conducted a Credit Card Fraud Detection project, applying machine learning algorithms to identify fraudulent transactions and enhance security measures.
 - Designed a predictive model for Titanic Survival Prediction, leveraging statistical analysis and data visualization to identify survival factors.

Projects

- MATH WITH GESTURE PROJECT

 - Created an advanced gesture-based math tool using Python, OpenCV, and MediaPipe, integrated with the Gemini API to interpret hand gestures and solve a variety of math problems in real-time.
 - Introduced an interactive, hands-on experience where users can tackle math questions with intuitive hand gestures, transforming traditional problem-solving into an engaging activity.
 - Developed a visually engaging and user-friendly interface that displays gestures and solutions instantly, enhancing the learning experience.
- ZOMATO RESTAURANTS ANALYSIS DASHBOARD

 - Built an interactive Power BI dashboard analyzing restaurant trends across 15 countries, 141 cities, and 250 cuisines.
 - Mapped city-wise density, top cuisines, and service options (table booking, delivery) to guide strategic decisions.
 - Leveraged DAX and data modeling for custom metrics and insights.
 - Enabled data-driven insights for restaurant owners, entrepreneurs, and investors.
 - Utilized cutting-edge technology to revolutionize math education, offering an innovative tool ideal for educational platforms and interactive learning environments.
- LOAN ELIGIBILITY DETECTION PROJECT

 - Developed a machine learning-based system to assess loan eligibility using Python, scikit-learn, and pandas, analyzing various customer attributes such as income, credit score, and employment status to predict loan approval outcomes.
 - Implemented data preprocessing, feature selection, and model training to accurately classify applicants as eligible or ineligible for loans, enhancing decision-making efficiency for financial institutions.
 - Built an intuitive and interactive user interface that allows users to input their personal and financial details, providing immediate eligibility feedback along with the reasoning behind the decision, thus improving transparency and user experience.

Skills

- Python** Libraries: pandas, numpy,seaborn matplotlib, Scikit-Learn
 - Power Bi Tools:** DAX, API, Power Query
- SQL** Software: MySQL, MariaDB, Postgresql
 - Excel Tools:** Pivot Table, Pivot Chart, Look-up Functions, Macros.

Education

- BACHELOR OF TECHNOLOGY – Maharaja Agrasen Institute of Technology – Rohini, Delhi

2021 - 2025

Majors: Artificial Intelligence and Data Science

Certification

- Business Analytics - Internshala Trainings

Data Science Masters 2.0-Pwskills
- SQL for Data Analytics- Internshala Trainings

Advance Excel - Internshala Trainings
