SHASHANK SHAHU

BUSINESS ANALYST

SUMMARY

Detail-oriented and analytical Business Analyst with strong foundational knowledge in data analytics, requirement gathering, and business documentation. Completed an internship project focused on analyzing customer behavior and sales trends for an eCommerce platform. Proficient in SQL, Excel, Tableau, and Python for data-driven insights. Passionate about solving business problems through data and process optimization.

EXPERIENCE

RentMart

Remote

Business Analyst Intern

11/2024 - Present

- Gathered and analyzed business requirements to map customer journeys and identify pain points.
- Developed interactive dashboards using Tableau and Excel to visualize sales performance and customer engagement metrics.
- Executed SQL queries to extract and manipulate data for in-depth analysis of product categories and sales trends.
- Conducted RFM (Recency, Frequency, Monetary) analysis to segment customers and tailor marketing strategies.
- Drafted comprehensive BRD documents outlining proposed system enhancements.
- Collaborated in an Agile environment, participating in sprint planning and daily stand-ups to ensure timely delivery of project milestones.

PROJECTS

Trendkart

11/2024 - Present

Nagpur

Project Summary:

Analyzed operations and customer data of an online retail store to identify growth opportunities, product trends, and optimize conversion rates.

Key Roles & Responsibilities:

- Gathered business requirements and mapped customer journeys.
- Created dashboards in Tableau to visualize product performance and user behavior.
- Executed SQL queries to identify top-selling categories and peak purchase times.
- Conducted RFM analysis to segment customer base and improve marketing focus.
- Drafted BRD and FRD for a proposed customer loyalty program.
- Coordinated with a simulated product team using Agile methods (sprints, user stories).
