Education.

• Medi-Caps University

B. Tech Electronics and Communication

2024.

CGPA: 7.45

PROJECTS.

• CreditTrends Dashboard:

- Developed an interactive dashboard using transaction and customer data from a SQL database, specifically targeting credit card
- Optimized data processing and analysis to monitor 21 key performance metrics and trends. Integrated microcontroller (e.g., Arduino or Raspberry Pi) for processing data.
- Delivered actionable insights to stakeholders based on dashboard findings to support decision-making processes.
- Utilized technologies such as **Microsoft Power BI, SQL, and DAX queries.**

• SQL Music Data Analysis:

- Spearheaded a project to analyze music data using SQL, involving comprehensive data collection, cleaning, and organization of over 20,000 records
- Designed and implemented a robust SQL database to efficiently store and manage music-related information for over 15,000 tracks.
- Conducted exploratory data analysis to identify trends and generate insights within the music industry, analyzing over 10 key metrics.
- Managed multiple CSV files and over 20,000 records, ensuring data integrity and consistency.
- Enhanced the system with error handling, input validation, and data backup capabilities to ensure reliability and data integrity.
- Utilized SQL queries to extract and manipulate large datasets, ensuring data accuracy and reliability.

Experience.

• LanceSoft, Indore

Jul 2024 – Present.

Client Coordinator

- Worked to enhance client satisfaction by contributing to improvements in client feedback processes, which significantly reduced response times for inquiries.
- Implemented project management strategies that facilitated the coordination of multiple client projects, ensuring timely completion and adherence to budget guidelines.
- Streamlined communication efforts with key clients, fostering stronger relationships and encouraging repeat business through effective support and engagement.

American Chase LLP, Indore

Feb 2024 – July 2024.

Data Analyst Intern

- Worked with over 100,000 rows of raw data, cleaned it up, and ensured accuracy before analysis.
- Analyzed trends and patterns in 5+ datasets using SQL, Python, and Excel to create weekly reports.
- Collaborated with 3 teams to turn complex data into clear insights, supporting decisions that impacted 20+ business operations.
- Automated 5+ repetitive tasks using Python and SQL, reducing report generation time by 30%.

Certifications.

• Data Analyst Job Simulation – Accenture North America.

• PowerBi Mastery – Office Master.

TECHNICAL SKILLS.

Languages: Python, SQL.

Courses/Work: Operating Systems (Linux, Windows), Computer Networks, , DBMS, Project Management.

Cloud/Databases: MySQL, Microsoft SQL .

Tools: PowerBi, ClickUp, MS Office
