OBJECTIVE

Aspiring Software Engineer with a strong foundation in data analysis, Power BI, SQL, Web Development and Python. Passionate about leveraging machine learning to identify trends and support decision-making in the industry.

EDUCATION

Bachelor in Computer Engineering [BE]

Pune University

- Jayawantrao Sawant College of Engineering
- Aggregate CGPA-8.54 (80.4%)

XII'th (State Board)

Dhanaji Nana Chaudhari Jr College

- North Maharashtra University
- Percentage-93.17%

X'th (CBSE)

St. Joseph's Convent School

- Percentage-91.8%

SKILL

- Languages: Python, MySQL, HTML, CSS, Javascript, Java
- Tools: VS Code, GitHub, Excel, Power BI, Power Point
- Data & ML: EDA, Machine Learning
- Libraries: Matplotlib, Pandas, Numpy, Seaborn
- Soft Skills: Problem Solving, Communication

PROJECT

Sales Analysis-PowerBI & SQL

- Identified sales trends and peak periods.
- Implemented KPIs to track key metrics like total sales, total orders and Quantity sold.
- Slicers for filtering and segmenting sales data
- Created measures such as Total Sales, Average Sales per Month and many more using DAX.
- Data Modeling: Define relationships between data tables.

Data Cleaning And Exploration-SQL

- The project involved using CTEs, various SQL functions, and JOINS to clean and transform the data, effectively handling duplicates and missing values.
- Filtering, sorting, and window functions were then applied to analyze trends and generate insights for business decisions.
- Identify and replace missing values.
- Use functions like UPPER(), LOWER(), and TRIM() to standardize text.

Adventure Aura-Travel web

- Interactive website featuring responsive cards showcasing diverse travel destinations and packages.
- HTML and CSS design elements ensure a visually engaging layout with vibrant images.
- JavaScript to enhances websites by adding dynamic behavior and interactive forms.

INTERNSHIP

Forage.com-Data Visualisation: Empowering Business with Effective Insights

- Gain hands-on experience with real-world data analytics tasks.
- Clean the datasets and merge them to prepare the data for analysis
- Leveraging tools such as Power BI.
- Choose the data visualizations that best support the client requirement.

Codsoft -Data Science Intern

Duration Dec 2023 -Jan 2024

Certificate ID - 94b188c

- Data Manipulation with Pandas : to Loaded, cleaned, and transformed data using Pandas for analysis.
- Data Visualization with Matplotlib: Created visualizations such as charts and plots to illustrate data trends.
- Predictive Modeling with Machine Learning Algorithms to predict values based on historical data.
- Model Training and Testing Split data into training and testing sets, and optimized model performance.

CERTIFICATE

- **Google Data Analytics Specialization**
Credential IDXDCZJZFEWQKF
- **Learning Microsoft Power BI**
Issued -Infosys Spring Board

INTEREST

- Cricket
- Travelling
