

CAREER OBJECTIVE

Analytical and results-oriented professional transitioning into data analytics, with a strong foundation in data extraction, validation, automation, and reporting. Backed by 1.5+ years of ERP (SAP Security) experience and certifications in SQL, Power BI, Python, and Excel. Skilled in transforming raw data into actionable insights, building interactive dashboards, and enabling data-driven decision-making. Adept in cross-functional collaboration, stakeholder communication, and process optimization, with a sharp eye for detail and a problem-solving mindset.

PROFESSIONAL EXPERIENCE

Programmer Analyst

Cognizant Technology Solutions, Bengaluru • Mar 2022 – Sep 2023

- Managed and validated system access controls using SAP, aligning with audit and SOX compliance requirements.
- Led User Access Management (UAM) activities and acted as the single point of contact for access reviews across SAP and other systems.
- Designed and maintained automated Excel dashboards with pivot tables, conditional formatting, and macros to streamline compliance reporting
- Extracted and validated user-role data from ERP systems and performed root cause analysis on access-related discrepancies.
- Generated monthly, quarterly, and yearly audit reports, improving turnaround time for stakeholder decisions.
- Collaborated with client administrators to drive improvements in access review outcomes, ensuring adherence to audit and security standards.
- Managed high-priority (P1/P2) incidents with zero escalations, maintaining a consistent CSAT score of 4.5+/5.
- Authored detailed SOPs and contributed to automation and process efficiency improvements in UAM workflows.

EDUCATION

Bachelor of Engineering (Aeronautical)

Mangalore Institute of Technology & Engineering

CGPA: 8.8

2017 - 2021

CERTIFICATIONS & TRAINING

- **Data Science Certification** – Internshala
- **Data Visualization with Power BI** – Internshala
- **Advanced Excel** – Internshala
- **Python for Data Science** – Internshala
- **SQL for Data Analysis and Insights** – Internshala
- **Data, Data Everywhere** – Google

PROJECTS

Walmart's Retail insights optimization SQL:

Analysed sales growth, customer segmentation, and product performance using advanced MySQL queries to identify top-performing branches, profitable products, and customer trends, delivering actionable insights through SQL-driven reports and visualizations.

Airline Performance Analysis using Power BI:

Transformed and cleaned airline data in Power Query, created DAX measures for booking and flight analysis, and built interactive Power BI dashboards with dynamic visuals, slicers, and real-time reporting features.

HR Data Analysis and Attrition Prediction Power BI:

This HR Analytics dashboard helps to analyze employee data and uncover trends in attrition, performance, and demographics, enabling HR and leadership to improve employee retention, engagement, and workforce planning.

Electric Vehicles Market Size Analysis PYTHON:

Analysed EV datasets to uncover insights on battery capacity, range, and energy consumption, developed a Python-based recommendation system, and used hypothesis testing to compare Tesla and Audi engine performance for strategic recommendations.

TECHNICAL SKILLS

- **Tools:** Power BI, SQL, Excel, Python
- **Analytics & Reporting:** KPI Tracking, DAX, Data Cleaning & Transformation, Power BI dashboards, Excel reporting
- **Business Intelligence:** Statistical Analysis, Data Modelling
- **Soft Skills:** Problem-Solving, Cross-Functional Collaboration, Effective Communication, Attention to Detail

ADDITIONAL INFORMATION

- Willing to work in client-facing and shift-based roles.
- Quick to adapt to new business domains and contribute to cross-functional success.
